## Strongest hurricane since Camille threatens Coast

By LESLIE WILLIAMS  
Precautionary measures against Hurricane Frederick were performed under calm skies Wednesday morning, but by afternoon weather reports warned the violent storm generating 130-mile winds would swirl inland between Gulfport and Mobile about midnight.

By 1:30 p.m. Wednesday, evacuation orders had been issued by the National Weather Service in Mobile for specific and unspecified low-lying areas in Baldwin County, Ala.; Jackson, Harrison and Hancock counties in Mississippi. Specifically in Hancock County, areas to be evacuated were listed as those places along the Jourdan River which were likely to be under water in five-foot tides; Bayou LaCroix, Lakeshore, Clermont Harbor, Ansley, Shoreline Park, and low sections of Waveland east of the L&N Railroad tracks. Henderson Point and Pass Christian Isles in Harrison County were included among early evacuation areas. Hydrologist James Haerpel at the Ri-

ver Forecast Center in Silldell said Wednesday afternoon, "Minor to moderate rises of the East Pearl River are expected between 7 p.m. and 7 a.m."

Four shelters were opened at noon by the Hancock County Red Cross—the White Cypress Community Center, Annunciation School, Waveland Elementary School and Bay Junior High School.

Hancock County Red Cross Chapter Chairman Charlie Barrack said approximately 25 persons had come to shelters Wednesday at 2 p.m. and he anticipates 200 to 300 more.

Persons coming to shelters were urged to eat before coming and bring along one meal, blankets, pillows, and games for the kids, Barrack stated.

## Bay board discusses 'secret' legal matters

By RICH ADAMS  
The Bay St. Louis Municipal Separate School Board adjourned its meeting Monday night after conducting a half-hour executive session.

The board retreated behind closed doors, shutting out the public and press, after Board Member Betty Diboll requested the executive session "to discuss legal matters."

Upon return from the secret session, the board then immediately adjourned. Board members would not elaborate on what had been discussed during the executive session, but Diboll's allusion to 'legal matters' indicates the board may have been discussing a recent lawsuit filed against each board member and Superintendent J.D. McCullough.

The class action suit was filed Aug. 14 in U.S. District Court for the Southern District of Mississippi in Biloxi charging the defendants with "intentional denial of civil rights."

The court action was filed by the North Bay Parent-Teacher Organization, the Bay St. Louis Local, American Federation of Teachers, and individually by PTO President Lana

Noonan; Local AFT President Andrews Wilkinson; Charles Gottschalk; Gloria Holland; and Mrs. Elmer Boyd.

The suit asks the court to award \$20,000 to the plaintiffs, which is stipulated in the suit to be used to purchase air conditioning at the district's schools.

Also at Monday's meeting, the board discussed expenditures listed on the monthly claims docket, specifically a \$12,000 bill for bus repairs and maintenance and a \$28,000 bill for school insurance.

McCullough explained the buses needed brake and drum work prior to the beginning of school, and added the insurance was necessary.

The board also accepted bids for three pick-up trucks, accepting a bid of \$4,576 each from Turan-Lane Chevrolet.

Another bid was received from Charlie Henderson Ford, asking \$4,927 each.

The Turan-Lane bid was accepted by the board, and McCullough insured the trucks will be painted school colors and

### At Bay schools

## Feasibility study recommends construction, consolidation

A feasibility study prepared by the State Department of Education and presented to the Bay St. Louis Municipal Separate School Board Monday recommends some \$1.05 million in capital improvements during the next five years.

The study further recommends consolidation of the county's two school systems prior to construction of a new junior high school south of I-10 within the next five years.

The study, presented to the board by Dr. Bobby Stacy, Dr. James Jones, and Gerald Pebey of the State Department of Education contains a 10-year projection of growth in the school district, but Stacy told the board only to

consider a five-year projection as most accurate.

"If we go beyond five years, we get into trouble because of so many variables," Stacy told the board Monday night.

At North Bay Elementary School, the report suggests the school district construct 10 classrooms and a media center.

The authors of the feasibility study said North Bay's enrollment will increase by 102 students in the next five years, a 14.1 percent increase.

Jones said five trailers used as temporary classrooms will have to be replaced, and 10 classrooms built at the facility.

Jones cited the library, or media center, as being "too small and poorly located" at North Bay, and further recommended a new library be built.

The researchers said Waveland Elementary school is going to be the "real site of growth," predicting the school will gain between 263 and 288 students by 1983.

"If you divide those figures by five, that means 50 to 70 additional students each year," Jones told the board.

"At present, with your space utilization, you can accommodate 300 students...you are overcrowded by 60 children," he added.

Jones said 14 classrooms must be built at Waveland to handle the projected influx of students.

In their report, the researchers say, "The roof is in deplorable condition. Ceiling paneling in the structure is ruined where rain water has left stains. A new roof is in the process of being installed."

### News Briefs

**SQUARE DANCING**  
Final date for sign-up in square dancing classes being conducted at the Disabled American Veteran Hall at 111 Main St. in Bay St. Louis is at 7:30 p.m. tonight. Instructor is Carl Walmsley.

**DINNER THEATRE OPENING**  
Formal opening of a cabaret-dinner theatre production of 'Champagne Complex' at Minacapelli's in Silldell is at 8:30 p.m. Friday with buffet served at 6:30 p.m. For reservations, call 504-643-9671.

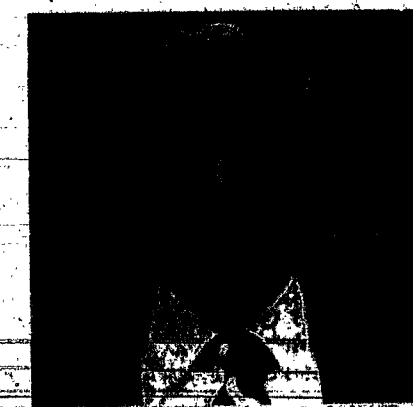

**DELINQUENT TAX SALE**  
The annual delinquent tax sale for Hancock County will begin at 9 a.m. on the steps of the Courthouse Monday. The Bay St. Louis and Waveland delinquent tax sales are also slated for Monday at the respective City Halls.

**COUNTY FAIR**  
The 1979 Hancock County Fair gets underway Monday with the set-up of booths continuing through Tuesday. The Farm Bureau and talent contest will be Wednesday, Sept. 13. Non-perishable entries will be accepted Tuesday and Perishable entries will be received Wednesday. Exhibitors will be to be entered Wednesday, Sept. 13, and set for Thursday, Sept. 14. The fair will be staged at the County Fair Grounds on the Old Longfellow Road, Bay St. Louis, on Friday, Sept. 14, sponsored by the Bay St. Louis Rotary Club. The fair dates are Sept. 13-14.

## Wyatt eyes supervisor's position

### CLEVELAND WYATT

Independent candidate Cleveland H. Wyatt Jr., 43, of Kiln is seeking the office of Hancock County Best Four Supervisor.

The senior repairman for Tennessee Gas served in the United States Navy. He is a graduate of Kiln High School. Wyatt is married to Deborah H. Wyatt, and they have one daughter, Beverly Ann, 15.

"I have given serious thought to running for office and becoming a candidate for supervisor since I am affiliated with any other candidate, past or present, and intend to run on my own merit," Wyatt proclaimed.

Wyatt said he would like to see the county's two school systems consolidated and a new junior high school built south of I-10. He also said he would like to see the county's two school systems consolidated and a new junior high school built south of I-10.

## Peterson runs for supervisor

Independent candidate Robert (Bob) Peterson, 40, of Waveland is seeking the office of Hancock County Best Four Supervisor.

Peterson is a graduate of Waveland High School. He is married to Joyce (Tommy) Peterson, and they have one daughter, Kimberly, 15.

Peterson said he would like to see the county's two school systems consolidated and a new junior high school built south of I-10. He also said he would like to see the county's two school systems consolidated and a new junior high school built south of I-10.

## Two children die in trailer blaze

By RICH ADAMS

An early morning fire Wednesday claimed the lives of two small children in the Bienville Community near Hwy. 49 in northwest Hancock County.

Coroner Carl Banderet said Wednesday Nicole Lashay Mitchell, 2, and Michelle Annette Mitchell, 6, were killed when fire totally destroyed their family trailer.

The children's parents, Mr. and Mrs. Tommy Mitchell and a third child survived the blaze, Banderet reported.

According to the coroner, Mitchell rescued the four-year-old from the bla-

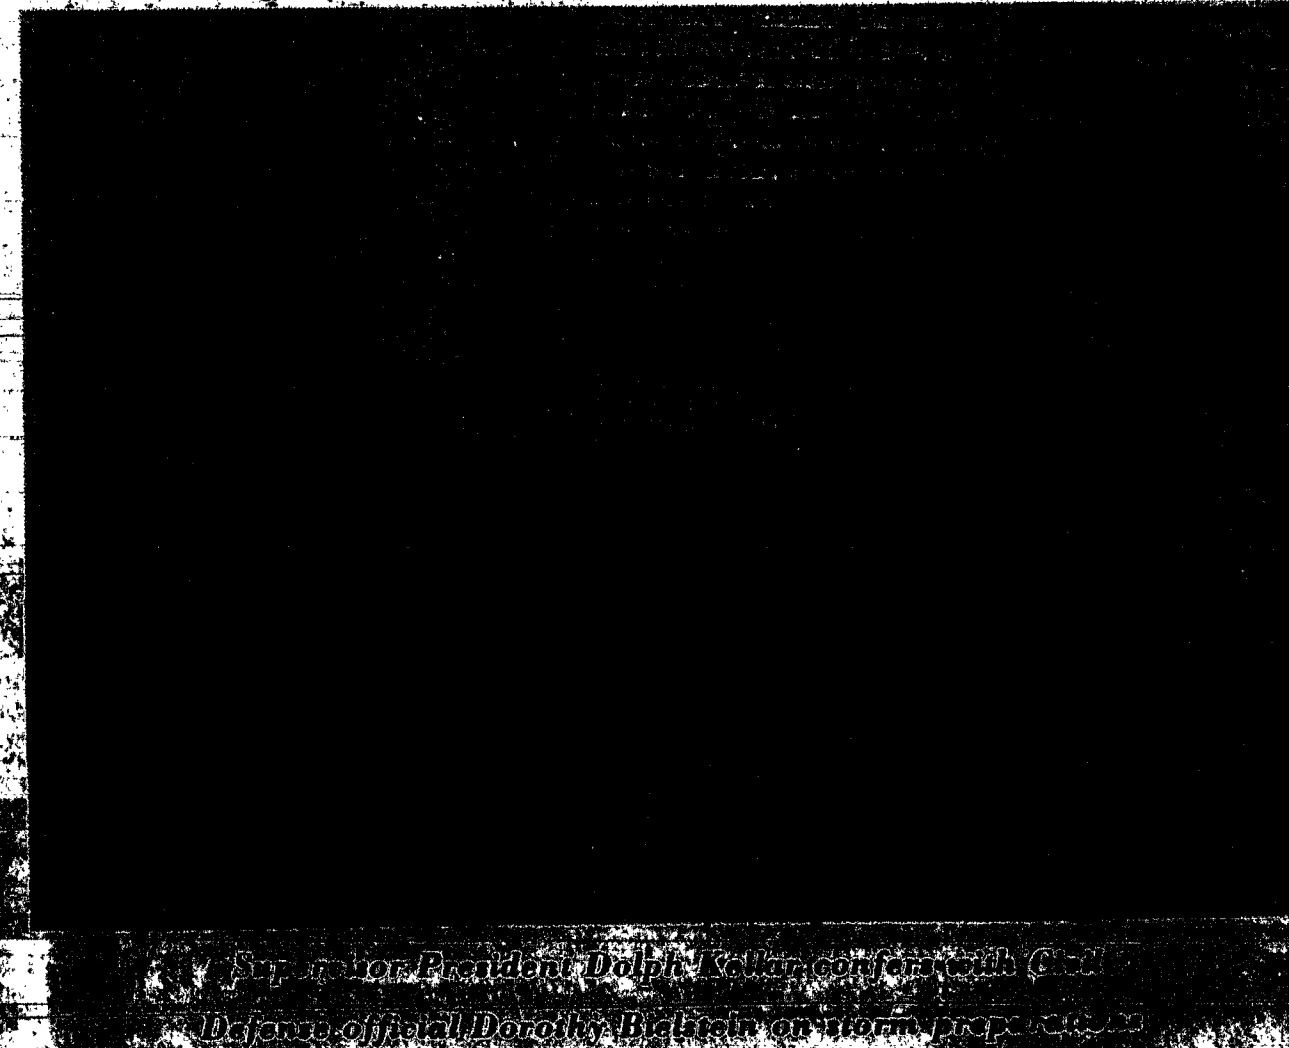

zing trailer.

The father was found on the ground near the trailer suffering from cuts and burns sustained in re-entering the trailer in the rescue.

He was apparently unable to return to the burning structure to rescue the other two children, Banderet said.

Mitchell and his wife were admitted to Crook Hospital in Piquette, he added.

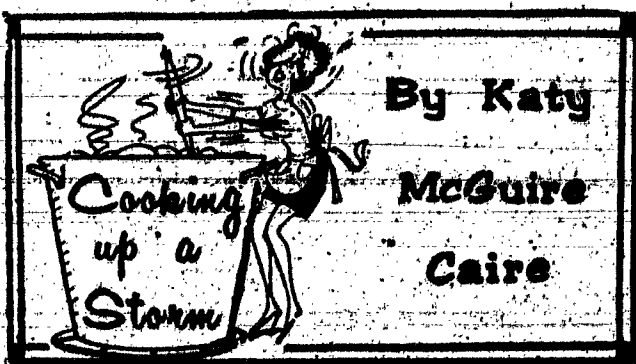

Fire Marshal Noel Cowart is investigating the incident along with Hancock County Sheriff Sylvan J. Lander Jr.

By Katy  
McGuire  
Caire

As man advances more and more technologically, he returns to the rites and mores of his ancestors, it seems.

Or so philosophized a friend the other afternoon when he stopped by our house and found spouse Ronny, like a good caveman of old, grilling dinner over the barbecue pit, ignoring the streamlined cookery set-up indoors.

There's something about cooking outdoors that makes everything taste better, from hamburgers to filet mignon. Some say that the word "barbecue" comes from the French "barbe a queue" (from beard to tail) in other words, the pig roasted whole on a spit.

Others vow that the name comes from the Spanish "barbacoa" - a framed made of sticks on which meat was set for roasting over a deep pit which held the fire, a method brought to Texas and Mexico by Spanish settlers.

Whatever the origin, it's an easy, happy way of cooking especially for us in our temperate climate almost year round.

Reportedly, the favorite American barbecue is steak, with pork and chicken close seconds.

But chuck roast, ham, lamb or sausage are delicious and also lend themselves well to outdoor cookery.

One of the easiest, everyone-for-himself barbecue feasts is brochettes or Shish Kebob consisting of cubes of meat combined on skewers with assorted vegetables, and cooked over the fire.

Cubes of chuck steak or chicken, marinated ahead of time, are among our favorites. Depending on the quantities you need, here's a good marinade:

1 cup burgundy wine  
3 Tablespoons red wine vinegar  
1/2 cup olive oil  
1 crushed garlic clove  
Several slices of onion  
Dashes of oregano, hot sauce, pepper

1 day leaf  
Mix all together, marinate your chosen meat a day or so, then drain and skewer alternately with mushrooms, tomato quarters, potato quarters, green pepper, onion chunks, water chestnuts.

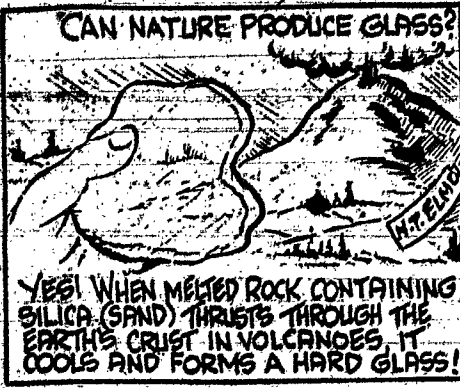

Grill 10 to 20 minutes or so, according to taste, and serve atop Rice Pilaf (rice cooked in

chicken or beef bouillon rather than water, and then enhanced with green peas or raisins or whatever strikes your fancy. (Copyright, 1979, Mrs. Katharine D.M. Caire)

## Concern for health reflected in decline of cigarette use

For the first time in this decade, total cigarette consumption dropped during 1978, and the Mississippi Lung Association, 520 Christmas Seal people think this may reflect a changing lifestyle by Americans concerned for their health.

Citing figures recently released by the tobacco industry, Dr. John F. Bussey, president, Mississippi Lung Association, noted a decrease of nearly 172,000,000 packs taxed from July 1978 through June 1979, compared to the previous year.

Actual figures, from a regular report of the Tobacco Tax Council, were 25,771,000 for 1978-79 and 25,942,200,000 for 1977-78.

An industry supported organization, the council regularly reports total consumption of tobacco products based on tax receipts.

Dr. Bussey said the decline, coupled with federal reports of the lowest per capita cigarette consumption in 20 years, could reflect concern for health signaled by mass devotion to diet, jogging and even roller skating.

"After all, not smoking is the best way to avoid lung disease," he said.

Dr. Bussey added that he hoped the new figures also would serve as proof that sales figures no longer can be used to obscure mounting concern about the cigarette's share in disease, death and health costs.

Only 33 percent of adult Americans now smoke

cigarettes, compared to 42 percent in 1964, Dr. Bussey said. The drop has been greatest for men, from 51 to 39 percent.

There's even heartening evidence that the rate at which teenagers take up the cigarette habit is beginning to decline, although for too many children still smoke, and at shockingly early ages.

Dr. Bussey said persuading young children never to take up the cigarette habit is a major priority of the Mississippi Lung Association. A special educational campaign is planned in October and November to alert parents and children to the dangers of smoking, Dr. Bussey added.

Anyone interested in information on the health hazards of smoking, "Thank You For Not Smoking" book cards or posters, or materials on quitting smoking, should contact the Mississippi Lung Association, P.O. Box 9805, Jackson, Mississippi 39206.

## Combined Federal campaign underway

A kick-off meeting for the 1979 Combined Federal Campaign, planned, was held Wednesday at the Rucker Air Force Base officers' club. Keynote speaker for the 19 a.m. meeting was Capt. R.J. McHugh Jr., commanding officer of the Gulfport Seabee Center and this year's campaign chairman.

The Combined Federal Campaign is sponsored by the Mississippi Coast Association of Federal Administrators. This annual fund drive, among federal employees in the four counties of Hancock, Harrison, Jackson and Pearl River supports 62 local United Way agencies plus the National Health Agencies and International Service.

Last year more than 21,000 federal military and civilian personnel were covered by the campaign and 90 percent of those solicited made contributions averaging \$16.27 per capita.

This is more than five times the per capita gift donated by non-federal employees in the area.

The goal for this year's campaign is \$360,000. Last fall's campaign collected \$356,112 with 71 percent or \$250,921 allocated to Gulf Coast welfare and charitable organizations.

Campaign donations will be solicited from Oct. 1 through Nov. 9.

**PHARMACEUTICAL EX-TERMIN:** Michael Phillips of Bay St. Louis, a fifth year student in the University of Mississippi School of Pharmacy, will begin serving an externship at Griffin's Pharmacy in Pass Christian this month. He is the son of Mrs. Inger Phillips of Bay St. Louis and will work under Hugh Griffin in the externship. Mr. Griffin is a Clinical Instructor for the University of Mississippi School of Pharmacy. As a Clinical Instructor he is providing a valuable service as a health team member by serving as a preceptor for training pharmacy students at Ole Miss. Students working in the clinical program gain valuable on the job training by having the opportunity to practice pharmacy under the direct supervision of a certified clinical instructor.

## ETV shows teaching children economics

"The research data show that children are able to effectively learn basic economics concepts from television instruction," according to Saul Rockman, director of research for the Agency for Instructional Television (AIT) in Bloomington, IN. Several instructional television series have been made available to schools over the past four years which assist school children in their understanding of economics. The key to understanding economics has been shown how children's personal daily lives are affected by their own economic decision making - relating economics to real life situations.

Dr. Michael A. MacDowell, president of the Joint Council on Economic Education, agrees that ITV can be a real boon to teaching economic concepts in the classroom.

For example, MacDowell is enthusiastic about the series "Trade Offs," which helps intermediate and junior high students deal with real economic situations and problems.

In remarks to a group of education writers, MacDowell said that new instructional materials, such as ITV programming, have helped fill a real void in the typical

American classroom. Fifty percent of all social studies teachers have not taken a course in economics, said MacDowell, and shows such as "Trade Offs," along with other materials, assist the teacher to present lessons about the free enterprise system and its various aspects.

In addition to "Trade Offs," which airs at 11:30 a.m. Tuesdays, Mississippi ETV is airing other series which help youngsters understand economic relationships. They include "Bread and Butterflies" at 10:45 a.m. Tuesdays; "Two Cents Worth" at 12:40 a.m. Wednesdays; and "Under the Blue

Umbrella" at 11 a.m. Mondays. In the spring Mississippi ETV will air six programs of the economic series it is now producing, "Pennysense."

These series reach children about the production and distribution of goods and services, competition, the uses of money, how to manage a small business and many other principles and concepts. Much of the economics material in these series was not available to teachers before these programs were produced, said Bill Perrin, associate executive director for field services for AIT. "They broke new ground."

## MHSP emergency vehicle takes Neshoba Fair award

In 1952, a need was recognized for a facility to provide emergency communication between law enforcement agencies, the Civil Defense, utility companies, and the National Guard during times of natural disasters or when the lives of Mississippians were in danger.

There were times when tornadoes would disrupt electric power in areas across the state limiting or completely eliminating emergency communication between agencies whose main concern was the safety and care of citizens. There were times when dangerous and armed felons would flee the protective walls of jails or prisons and place the lives of innocent people in jeopardy.

Unfortunately, these incidents would not always happen in a city large enough to have emergency generators to restore the badly needed communication systems. More often than not, these life threatening occurrences happened in rural Mississippi because most of the state was rural at that time.

Certainly when a convict was on the run, he would not flee to a city but would use heavily wooded areas for cover.

A mobile central command post with its own radio tower, transmitters, and receivers, would be ideal to have on hand so it would be transported to even the most remote area and still provide emergency communication. There was no such facility available anywhere in the United States at that time, but there soon would be.

The Mississippi Highway Safety Patrol, under the leadership of Colonel Thomas B. Birkson, who, with the assistance of the Civil Defense, purchased a new 1951 International chassis on a six-wheel frame that had been designed for use by the United States Postal Service as a highway mail bus. The original cost was about \$13,000.

Highway Patrol radio technicians drove the bus to Laurel, where Masonite Corporation took the skeleton hull and frame and modified it by using finished, quality, hardboard paneling resulting in an accomplished job of excellence and craftsmanship.

The interior became a radio room on wheels with six individual operator booths, and six bunk beds so that details lasting several days could be manned without outside lodging dependency.

The driver's area was enclosed by a mass of equipment. It was the first specially designed vehicle of its kind in the United States.

The Communications Bureau of the Mississippi Highway Safety Patrol filed for Federal Communications Commission licensing and the bus became known as the KKL 735.

When law enforcement agencies in the State hear radio traffic being transmitted on the KKL 735, they know that an unusual occurrence has either taken place, is taking place or is about to take place.

Since 1952, the 735 has seen duty during extensive manhunt for escaped convicts, during and after

destructive tornadoes and hurricanes, Presidential visits, and other such happenings from the Tennessee State line to the Gulf Coast. Its interior has been reconstructed with the removal of three bunk beds (which left three), and with the addition of a gas stove, a refrigerator, limited bathroom facilities, and hot water.

It is equipped with its own 54-foot tower that is raised when the bus is in a stationary position for receiving and transmitting long distance radio traffic.

Telephone equipment and five telephones have been installed for immediate hook-up with local service at a site. A 527 cubic inch eight cylinder engine has been installed

giving the bus a top highway speed of 60 miles per hour. Power is supplied by a 3 kilowatt generator, and another 10 kilowatt portable generator can be attached. The most recent trip made by the 735 was to the Neshoba County Fair where it was on display as distribution center for safety brochures from the Highway Patrol.

While there, Granville Jones, President of the Screwball Antique Vehicle Club of the Meridian area, recognized its antique value and the bus took first place for being the Oldest Known Vehicle Active in Law Enforcement Work.

A plaque has been presented to the patrol for maintaining the vehicle, which will be the 735's only wall decoration.

## State Medical association offers safe camping tips

### FAMILY CAMPING CAN BE MADE SAFE

To millions of Americans, living in the woods for a few days is one of the most enjoyable and relaxing vacations. Proper planning and adequate precautions against potential health hazards can make the camping trip relatively hazard free.

The trick is to make the camp a well-managed and safe one, rather than a haphazard affair.

The Mississippi State Medical Association suggests you examine the equipment carefully, including bedding and tents, and also your clothing, cooking equipment and food.

Sleeping bags and air mattresses provide more comfort than cots. The enjoyment of camping depends a great upon a good comfortable bed.

Select clothing with regard to the season, freedom of movement, and protection from insects, briars and heavy

brush. Include rain jackets and proper sleep clothing.

Adequate meal planning for a camping trip is of paramount importance. The camper's health depends on well-selected and substantial foods. Precautions must be taken for safe preservation of all foods on a camping trip. Refrigeration, for instance, usually is lacking, or primitive.

Running water is not necessarily clean water. Campers should use water only from springs and wells that have been declared safe. If necessary to use water from creeks, lakes or rivers, boil it before use, or use water purification tablets.

Select the route for the camping expedition well in advance, and brief members of the group on landmarks. Equipment should include a first aid kit, comfortable shoes, matches in a waterproof container, a compass, rainwear and an ax or hatchet.

## V A Briefs

**Q - I am a veteran taking nurses training in a VA Vocational Rehabilitation Program. Will VA pay for the uniforms I require for the training?**

**A - VA will not pay for uniforms or other apparel worn instead of ordinary clothing. Apparel or other items needed for protective purposes will be authorized for veterans in vocational rehabilitation training.**

**Q - I am a veteran receiving educational benefits. My remaining entitlement period of three months will end with the fall semester. I would like to terminate my benefits now and use those three months to complete the spring semester. Is this possible?**

**A - VA regulation 11045(G) states that a certified period of enrollment may not be interrupted for the purpose of conserving entitlement.**

**Q - My father was killed in service. My mother is entitled to a VA guaranteed home loan but she does not plan to use the benefit. Can I use the entitlement to purchase a home?**

**A - No. The entitlement is extended only to the spouse of a veteran who died in service.**

**Q - Can a child adopted after age 18 by a veteran who has permanent and total service connected disabilities qualify for dependent educational assistance?**

**A - Yes. Such an individual is considered the child of the veteran and eligible for benefits until attaining age 26, provided the child is pursuing a course of instruction at an approved educational institution.**

## Safe-water course slated Oct. 8-12

Water, a tasteless, colorless, odorless liquid, is one of the necessities of life; but not all water is safe for healthy lives.

The people who operate public drinking water systems and waste water control facilities in Mississippi need to know whether water is safe to drink and how to prevent pollution.

Water and waste facility operators need to know how to sample water, interpret the results, and, if necessary, how to treat the water to make it healthy for humans.

The operators can learn the skills they need to comply with federal and state laws governing water and waste water facilities at an October 8-12 short course at the University of Southern Mississippi, Gulf Park Campus at Long Beach.

The Department of Civil Engineering at Mississippi State University sponsors the short course in cooperation with the Mississippi Water and Pollution Control Operators Association, Inc., the Mississippi State Board of Health, and the Bureau of Pollution of the Mississippi Department of Natural Resources.

Course participants will study water microbiology, chemistry, and treatment; chlorinator installation and safe handling of chlorine; and how to solve pressure problems.

Each operator will learn techniques for the particular size and type facility in which he works.

Mississippi does not require operators to be certified, but the Water and Pollution Control Operators Association, Inc., offers a voluntary certification program.

On completion of the short course offered twice a year at Mississippi State University and on the Coast, and passing an exam, operators may apply to the association for certification.

Some 300 drinking water and 400 pollution control operators will be attending the short course and exam at the University of Southern Mississippi, Gulf Park Campus at Long Beach.

For more information, contact the Mississippi State Board of Health, 354-6615; the Bureau of Pollution of the Mississippi Department of Natural Resources, 354-2550; or from Professor Howard K. Willford, Mississippi State University, 325-4434.

ding, assistant chief of the Bureau of Environmental Health, State Board of Health. "The law requires operators to sample water supplies for bacteria, but many do not know how to take the sample properly, read the results, or what to do about a problem."

"Every operator needs to know how to tell if something is wrong and what to do about it," Redding emphasized. "People often complain that water stains, has an odor, tastes bad, or is discolored, which alone won't hurt anyone. What's dangerous is bacteria - and operators need to know when their water contains bacteria and what to do about it."

Course participants may register from 4 to 9 p.m. October 7 or from 7:30 to 9 a.m. October 8 at Hardy Hall Parlor, Gulf Park Campus, USM.

Additional information is available from the Division of Water Supply, State Board of Health, 354-6615; the Bureau of Pollution Control, Department of Natural Resources, 354-2550; or from Professor Howard K. Willford, Mississippi State University, 325-4434.

## Forest landowners conference included in association meet

A forest landowner's conference will be a part of the Mississippi Forestry Association's annual meeting to be held Oct. 30-Nov. 1 in Jackson at the Coliseum Randa Inn.

Overall theme of Mississippi Forestry Association's 11th annual meeting is "Back to Basics."

Forest landowners will be invited to a conference on the Mississippi River Delta, which will include a tour of the area and a presentation on the importance of the delta to the state's economy.

Other program topics include: "The Role of the Forester," "The Role of the Landowner," "The Role of the State," and "The Role of the Nation."

John Wishart, vice president of Georgia-Pacific Corporation, will speak at the Wednesday night banquet.

Mississippi gubernatorial candidates will appear on Thursday morning at 10:30 a.m.

A golf and tennis tournament will be held on the afternoon of Tuesday, October 30.

Other program topics include: "The Role of the Forester," "The Role of the Landowner," "The Role of the State," and "The Role of the Nation."

Those interested in attending the conference should contact the Mississippi Forestry Association, 1111 North Main Street, Jackson, Mississippi 39201.

Forest Experiment Station, New Orleans, Louisiana; and Mrs. Sandra Black, McRae's, Jackson.

Advance registration are now being accepted from those planning to attend the forest landowner's conference only or the entire MFA annual meeting held MFA president William M. Jones, Jr., Jackson.

Those interested in attending the conference should contact the Mississippi Forestry Association, 1111 North Main Street, Jackson, Mississippi 39201.

Those interested in attending the conference should contact the Mississippi Forestry Association, 1111 North Main Street, Jackson, Mississippi 39201.

## HANCOCK COUNTY DEBT SERVICE FUNDS BUDGET OF ESTIMATED RECEIPTS AND DISBURSEMENTS For Fiscal Year Ending September 30, 1979-80

DISBURSEMENTS		TOTAL	
ROAD IMPROVEMENTS		State Road District Account	
324 Countywide Pollution Bonds - All Issues	\$ 178,000	341 Motor Vehicle Pool Tax	\$
327 County Road Plan, Collection Bonds - All Issues	15,000	342 Motor Vehicle License Tax	\$

## Biloxi hearing Sept. 18-19

# Hazardous waste regulations to be reviewed this month

Mississippians will have three opportunities this month to voice their views on a proposed "from the cradle to the grave" approach to the management of hazardous wastes.

The Mississippi State Board of Health will conduct public hearings at 9 a.m. September 13-14 at the Coliseum Ramada Inn, Jackson; September 18-19 at the Admiral Benbow Inn, Biloxi; and September 24-25 at the Lee County Public Library, Tupelo.

The agency's Division of Solid Waste Management and Vector Control drafted the proposed regulations after the Mississippi Legislature amended the Solid Waste Disposal Law to conform with the federal Resource Conservation and Recovery Act. The amendment requires the State Board of Health to develop and implement a hazardous waste management program.

Until now, the state has had no formal program for the management of hazardous wastes, even though a 1974-75 survey showed that Mississippi industries were producing more than 21 million cubic feet of hazardous wastes a year.

The proposed hazardous waste regulations specify which wastes are hazardous. Generally, wastes termed "hazardous" are toxic, infectious, ignitable, reactive (explosive), low level radioactive, carcinogenic, mutagenic-teratogenic, or are substances that bioaccumulate.

Included among hazardous wastes are some pesticides,

paints and solvents, waste oils, wood treatments, wastes from printing press cleanup, and metal plating and finishing and chemical wastes.

The proposed hazardous waste regulations give specific guidelines for hazardous waste generators, transporters, and owners—operators of facilities for the treatment, storage, or disposal of hazardous wastes.

Mississippi currently has no regulated or controlled sites for the treatment, storage, or disposal of hazardous wastes.

Some industries have on-site facilities and many others are using non-hazardous solid waste methods to manage the hazardous wastes. Others transport their hazardous wastes to disposal sites in Alabama, Louisiana, Texas, or Illinois.

If the proposed regulations are adopted and implemented, both industry and government will for the first time have a "rulebook" to follow in the management of hazardous wastes. The regulations also provide a penalty procedure for those who fail to comply with the rules.

"The regulations are very technical, very restrictive," commented Jack McMillan, director of the Division of Solid Waste Management and Vector Control, State Board of Health. "The system of management will cost a lot of money, but it will provide for the first time in Mississippi—protection of public health and the environment."

Copies of the proposed regulations have been available since mid August at

the District Health Departments in Holly Springs, Clarkdale, Tupelo, Greenville, Greenwood, Starkville, Meridian, McComb, Hattiesburg, and Gulfport and at the State Board of Health in Jackson.

"We want the public to study the proposed regulations and suggest how to ease the economic impact," McMillan said. "We need

their ideas on financial responsibility and on how to balance the risks and management problems.

"In managing hazardous wastes, disposal is the last goal," he emphasized. "Our real aim is conservation and recovery; we want to find ways to use the wastes. We find that the proposed regulations will provide the needed flexibility to safely

manage the hazardous wastes until the real goal can be met."

After the public hearings in September, McMillan's division will submit the regulations to the State Board of Health and the U.S. Environmental Protection Agency for final approval.

Implementation could begin in the latter half of 1980.

Merle Shain's *WHEN LOVERS ARE FRIENDS* captures the essence and provides reassuring insights into living and loving in the 70's and 80's, and was released as a Bantam trade paperback on September 1.

Merle Shain, referred to as "the Erma Bombeck of love" by another reviewer, offers compassionate and wise words about the greatest emotional "Catch-22" of our time—fear of intimacy and commitment, and our seemingly contradictory fear of loneliness.

*WHEN LOVERS ARE FRIENDS* explores such themes central to our lives as: how can we find love and keep it flourishing without running from it; how to achieve greater self-acceptance; and how to maintain space for self-growth while involved in a love relationship.

An antidote to the 70's "me generation" philosophy, *WHEN LOVERS ARE FRIENDS* contains no pop psychology formulas. Instead, it is filled with the comforting thoughts of a contemporary woman who has been through the problems of modern living, a woman whose reflections are personal, yet universal in their insights.

On Love—We are all with me as a sort of dowry and afraid of being swallowed up tell my new husband that he by love, of ceasing to exist, was getting a rich wife."

except through someone else. On Independence—"It is so we rush toward love with easy when you've been hurt by

Merle Shain

open arms and hide from it when it comes to us.

"Love is short, forgetting's long, and understanding takes longer still. And sometimes it is hard to know what someone has given us, or even what we have given them, until a long time after the event."

On Friendship and Marriage—"I'm almost certain that if we had more friendships we'd have fewer marriages which break up, and a lot of mates who might have strayed would be content to stay at home. "If I were to marry again tomorrow, I wouldn't give up one friend. I'd take them all

love to give it up as a bad job, and make independence your new god, taking the love you had to give and turning it in upon yourself.

"The answer doesn't lie in learning how to protect ourselves from life—it lies in learning how to become strong enough to let a bit more of it in."

Merle Shain is a communicator—aside from being a bestselling author, she has also written screenplays, magazine articles, and newspaper pieces, and has worked as both a radio and television broadcaster. She lectures extensively in the U.S. and Canada.

## Inflation may cause auto insurance rate increases

In spite of the reduced amount of driving the current crisis may be generating, inflation is pushing up the cost of items for which auto insurance pays, creating pressures for auto insurance premiums to rise.

"Even though the 1973-1974 energy crisis brought about a reduction in driving and traffic deaths, these potentially beneficial effects on auto insurance were negated by a double-digit inflation rate; and substantial increases in auto insurance rates followed," said H.C. Garrard Jr., a member of the Insurance Information Institute's Mississippi Committee.

"Right now we are experiencing another energy crisis, and inflation is again approaching a 14-per-cent annual rate. It is logical to assume that auto insurance rate increases to cover rising loss costs may not be far behind."

Mr. Garrard pointed out that insurance rates are based both upon the frequency of claims and the average amount an insurance company has to pay for each loss.

Although the frequency of claims has been dropping in Mississippi in recent months due only in part to the energy crisis—the average amount paid per loss has risen substantially.

From 1976 to 1978, the insurance industry's average annual rate of increase in claims was 14.5 percent, while the average annual rate of increase in loss costs was 10.3 percent. The average annual rate of increase in loss costs was 10.3 percent, while the average annual rate of increase in claims was 14.5 percent.

the claim frequency was down 7.9 percent; but the average paid loss climbed 16.2 percent.

For liability claims (losses to another's person or property caused by a policyholder) the claim frequency for property damage losses dropped 9.2 percent from 1976 to 1978. The average paid loss however, rose 31.9 percent.

Bodily injury losses also showed a decrease in claims frequency (9.5 percent) and an increase in the average paid loss (10.3 percent). "While an oil shortage does not bear a direct relationship to auto insurance rates, it has contributed significantly to a rising rate of inflation," said Mr. Garrard. "And inflation is a root cause behind auto insurance rate increases."

Inflation affects auto insurance rates so drastically because it pushes up the cost of items for which auto insurance pays. For example, State Farm's index on auto crash parts shows that the

cost of those items frequently damaged in accidents increased 138.3 percent between 1972 and 1978.

For the same period the average wage rate in auto body shops increased 43.6 percent in Mississippi. Between 1971 and 1978 the average cost of a semi-private hospital room in Mississippi more than doubled.

These increases are part of the reason auto insurance rates in Mississippi have risen 25.1 percent since 1972 for companies who use rates filed by the Insurance Services Office.

"There is one bright spot in the picture," Mr. Garrard said. "Mississippi residents used less of their income to pay for auto insurance last year (1.49 percent) than they did in 1972 (1.63 percent). Insurance also continued to account for a relatively small part (13.5 percent) of the dollars spent for user-operated transportation expenses."

## Biloxi Lions plan 4th annual market

The Biloxi Lions Club will hold its fourth annual Market and Craft Sale in the historic Market Square in Downtown Biloxi near the Golden Gate Bridge, Friday and Saturday, October 19 and 20, from 9 a.m. to 5 p.m.

The market will feature a wide variety of goods, including furniture, home decor, and clothing. The sale is open to all, and the proceeds will be used for the club's charitable activities.

Any civic organization, club, society, or private individual is invited to set up a table with the Lions Club for one or both days.

A theme song will be played during the market. All are invited to enjoy the day and support the club's efforts.

# GCRL report indicates Barrier Island erosion

Horn and Petit Bois islands are part of a chain of islands which are barriers that protect the coastal mainland of Mississippi from the prevailing great waves of the Gulf of Mexico.

Great swells relentlessly pound with considerable force the outer (southern) barrier island beaches, where the energy is largely dissipated. This process spares the mainland beaches and is the key factor responsible for the relatively calm waters of Mississippi Sound and our tranquil bays and bays.

In recent years, geologists have shown that Horn and Petit Bois are moving westward and that they are diminishing in size, caused primarily by erosion. Since the chain of islands plays an integral part in maintaining our coastal environment and daily lives, it is prudent that we learn much about them. Since most barrier islands are covered with vegetation and vegetated areas are known to have slower erosion rates than comparable barren areas, an important question arises: Has something happened to the vegetation on the islands which is responsible for erosion?

Thus, it is reasonable to assume that the presence or absence of biological entities and plant assemblages on the islands have a direct or indirect large-scale impact on our daily lives.

A quantitative study of numerous facets was initiated by the botany section of the Laboratory in 1976 to determine the kinds of plants and plant communities found on Horn and Petit Bois islands, how the plant communities were interrelated; and what biotic factors (especially mammals) and physical factors affected the vegetation.

Numerous minor facets of the island vegetation were also investigated or discovered while carrying out the other work. Dr. Lionel N. Eleuterius, head of the botany section, the principal investigator.

Collaborators on the project were Dr. Sidney McDaniel of the Department of Biological Sciences, Mississippi State University and Dr. Gerald Miller of Atlanta, Georgia. John Caldwell of the GCRL botany section staff contributed to all phases of the work, Eleuterius said.

Color-coded vegetation maps were prepared for Horn and Petit Bois islands with a scale of 1:8,450 feet, and these are included in a document describing the findings of the study. The title of the report is "A Phytosociological Study of Horn and Petit Bois Islands, Mississippi."

A total of 283 species of vascular plants were collected, 260 from Horn and 23 from Petit Bois. Plant communities were classified as to marsh, meadow or high marsh, beach and relic dunes, and woodland sites.

Vegetation composition of each plant community was determined as follows: marshes had the greatest diversity of species, 69; woodlands, 62; meadows, 56; northern beach dunes, 38; and southern beach dunes, 22. Barren shores, ponds and lagoons, and seagrass beds in the adjacent waters of Mississippi Sound were also determined.

Most of the vegetation on the islands was distributed on the north side, Dr. Eleuterius

pointed out. Broad expanses of beach dunes, often occupying more than half the width of the islands, were concentrated especially on the south side.

Horn Island (3300.0 acres) has over twice the area of Petit Bois (1438.6 acres) with about 82 percent of Horn and 78.5 percent of Petit Bois being vegetated. About 30 percent of Horn and 27 percent of Petit Bois were covered by beach-dune vegetation. Very little woodland was found on Petit Bois Island (13.7 acres) compared to 469.5 acres on Horn.

The average life span of pine trees on Horn Island was between 30 and 40 years; the average height of mature trees was 38 feet with the tallest being 75 feet. The oldest pine found was 91 years old and had the largest diameter, 17.5 inches. Mature oaks on the island were small compared to those found on the mainland.

Live oaks are relatively abundant on Horn Island, but Petit Bois has no oaks. About 40 mature oaks and 350 immature ones were counted on Horn, most of them scattered along the north side from the middle of the island to the east end.

The plant communities in the north central portion of Horn Island were the most stable due to a high, protective dune ridge several miles in length formed along the inner edge of the south beach dunes. Woodlands displayed the most stable terrestrial plant community and beach dunes, the least stable. Successional relationships between plant communities appeared to depend on elevational changes produced by sand deposition or erosion and modification of land configurations.

Protection from airborne sand appears to be the most important factor contributing to habitat stability, Dr. Eleuterius noted.

Interestingly, the erosion of sparsely vegetated beach dunes apparently affected all other plant community types by sand deposition.

Through the use of enclosures (wire pens) and other sampling techniques, the researchers learned that there was no significant effect on vegetation caused by hogs and nutria rooting up plants and rabbits grazing on aerial plant parts.

Continuous erosion and deposition of sand by wind, wave and current appeared to be the major factors affecting the vegetation.

Dr. Eleuterius said.

Color-coded vegetation maps were prepared for Horn and Petit Bois islands with a scale of 1:8,450 feet, and these are included in a document describing the findings of the study. The title of the report is "A Phytosociological Study of Horn and Petit Bois Islands, Mississippi."

A total of 283 species of vascular plants were collected, 260 from Horn and 23 from Petit Bois. Plant communities were classified as to marsh, meadow or high marsh, beach and relic dunes, and woodland sites.

Vegetation composition of each plant community was determined as follows: marshes had the greatest diversity of species, 69; woodlands, 62; meadows, 56; northern beach dunes, 38; and southern beach dunes, 22. Barren shores, ponds and lagoons, and seagrass beds in the adjacent waters of Mississippi Sound were also determined.

Most of the vegetation on the islands was distributed on the north side, Dr. Eleuterius

Hurricanes and storms, as might be expected, have catastrophic effects due to direct forceful impact and flooding. Changes in configuration of sand ridges often result in impounded rain water, which, in turn, caused changes in the vegetation.

The rare shrub "Conradina canescens" was found in one location on Horn Island and this is the only report of the species in Mississippi.

Fire is probably a natural part of island ecology and has no detrimental effects on vegetation if allowed to occur frequently. Reducing shrub understory in woodland areas is beneficial, but accumulated plant materials may fuel a devastating fire which could destroy the pines. Areas burned in winter subsequently had a greater diversity of plant species than areas not burned.

Shrubs dominated the meadows on Petit Bois Island, which had not burned for 20 years. The aerial portions of plants are killed by fire, thereby maintaining the meadows in a subclimax stage dominated by grasses and sedges.

Dr. Eleuterius pointed out that no significant difference was found in the floristic composition of plant communities located in the eastern, central, and western portions of Horn Island, even though the eastern portion is older, geologically than the western.

Some evidence was demonstrated by the shrub "Solidago pauciflora" that the species is potentially allelopathic, that is it may inhibit the growth of other vegetation.

Beach dune phytomass is thought to be regulated in some unknown manner to produce relatively uniform growth. Direct correlations were obtained between ground cover and biomass for the major beach dune species.

Ponds and lagoons have few submerged aquatic plants and

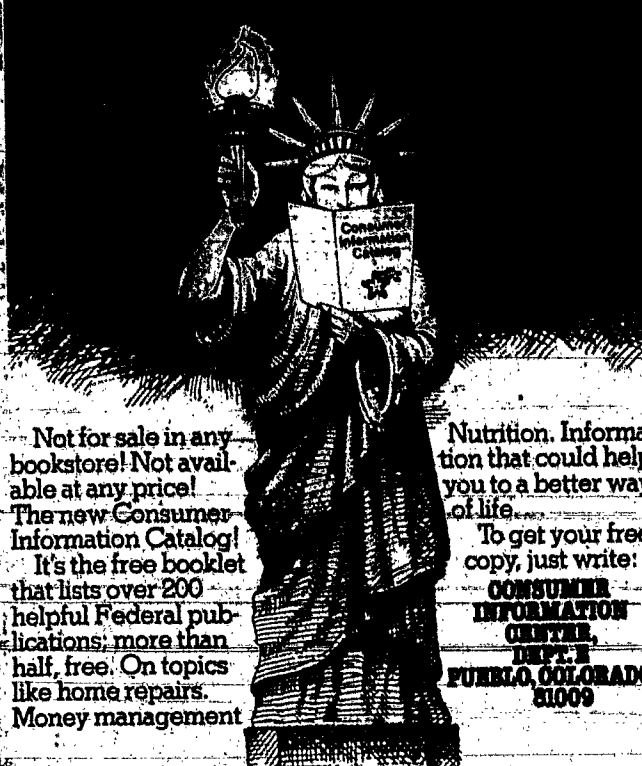

most of the bottom areas are devoid of vegetation, probably due to the muddy waters. About 1,100 acres of seagrass (vegetated bottom) occur in the shallow waters north of Horn and Petit Bois.

This research was partially funded by the National Park Service and by the Laboratory. The basic information is expected to be used in management of the islands which are part of the Gulf Islands National Seashore, and in planning future research, Dr. Eleuterius said.

Reference copies of the 192-page project report have been placed in public libraries along the coast and libraries located at state institutions of higher learning, Eleuterius said.

The document is also to be put on microfilm and information on availability can be obtained through the Coastal Field Research Laboratory of the National Park Service located in Bay St. Louis.

## Sand sculpture contest Saturday

The fourth annual Sun-Daily Herald Sand Sculpture Contest is scheduled Saturday, on the beach in front of Edgewater Plaza.

More than \$2,700 in cash and trophies will be presented to winners in the team sand sculpture competition and individual sand castle building contest.

Youngsters 12 and under may compete on an individual basis for over \$100 in cash and trophies in the Sand Castle

Building contest. The Sand Sculpture Contest will include teams of up to five members competing for \$240 in cash and trophies, with \$1000 going to the champion Sand Sculpture team.

The Sand Castle-Sand Sculpture Contest is open to the public and there is no entrance fee. Registration forms and rules are available from the Public Relations Office of Gulf Publishing Company, Inc., sponsors of the event.

Most of the vegetation on the islands was distributed on the north side, Dr. Eleuterius

pointed out. Broad expanses of beach dunes, often occupying more than half the width of the islands, were concentrated especially on the south side.

Horn Island (3300.0 acres) has over twice the area of Petit Bois (1438.6 acres) with about 82 percent of Horn and 78.5 percent of Petit Bois being vegetated. About 30 percent of Horn and 27 percent of Petit Bois were covered by beach-dune vegetation. Very little woodland was found on Petit Bois Island (13.7 acres) compared to 469.5 acres on Horn.

The average life span of pine trees on Horn Island was between 30 and 40 years; the average height of mature trees was 38 feet with the tallest being 75 feet. The oldest pine found was 91 years old and had the largest diameter, 17.5 inches. Mature oaks on the island were small compared to those found on the mainland.

Live oaks are relatively abundant on Horn Island, but Petit Bois has no oaks. About 40 mature oaks and 350 immature ones were counted on Horn, most of them scattered along the north side from the middle of the island to the east end.

The plant communities in the north central portion of Horn Island were the most stable due to a high, protective dune ridge several miles in length formed along the inner edge of the south beach dunes. Woodlands displayed the most stable terrestrial plant community and beach dunes, the least stable. Successional relationships between plant communities appeared to depend on elevational changes produced by sand deposition or erosion and modification of land configurations.

Protection from airborne sand appears to be the most important factor contributing to habitat stability, Dr. Eleuterius noted.

Interestingly, the erosion of sparsely vegetated beach dunes apparently affected all other plant community types by sand deposition.

Through the use of enclosures (wire pens) and other sampling techniques, the researchers learned that there was no significant effect on vegetation caused by hogs and nutria rooting up plants and rabbits grazing on aerial plant parts.

Continuous erosion and deposition of sand by wind, wave and current appeared to be the major factors affecting the vegetation.

Dr. Eleuterius said.

Color-coded vegetation maps were prepared for Horn and Petit Bois islands with a scale of 1:8,450 feet, and these are included in a document describing the findings of the study. The title of the report is "A Phytosociological Study of Horn and Petit Bois Islands, Mississippi."

A total of 283 species of vascular plants were collected, 260 from Horn and 23 from Petit Bois. Plant communities were classified as to marsh, meadow or high marsh, beach and relic dunes, and woodland sites.

Vegetation composition of each plant community was determined as follows: marshes had the greatest diversity of species, 69; woodlands, 62; meadows, 56; northern beach dunes, 38; and southern beach dunes, 22. Barren shores, ponds and lagoons, and seagrass beds in the adjacent waters of Mississippi Sound were also determined.

**TOUCHDOWN!** Willy Santiago, veteran running back for Hancock North Central, lands in the end zone for the third HNC score of the evening. Hancock defeated the OLV Eagles in their second game of the season, 21-14. The Hawks entertain Forrest County at home for their first home game of the season Friday night at 7:30 p.m. (Staff photo-Rich Adams)

To those many, many who supported me in the August Primary I say Thank You - to all the voters of Hancock and Pearl River Counties - for your support and vote in the November general election.

Sincerely  
**Martin T. Smith**  
State Senator

(Pd. Pol. Adv.)

### Selling Your Home; Buying A New One

By Dexter D. MacBride, ASA  
Executive Vice President  
American Society of Appraisers

Among the problems you face — and must solve — when selling your home and buying a new one, are: 1. How much is your present home worth, and, 2. What price should you pay for the new one.

Unless you are thoroughly familiar with the real estate market in both your present and proposed location, you will benefit by asking the advice of a professional appraiser. The appraiser who knows the "market place" where your home is located can give you documented evidence of the value of your property — data that will support your asking price and that can be important in dealing with purchasers and realtors.

When you are ready to buy your new home, you'll be searching for a money lender, to borrow enough to finance your purchase. Remember, you're in the market trying to buy money from a lender; the lender decides how much to lend based on an appraisal. Be sure to ask to see the lender's appraisal (you are probably paying for it).

If you feel you're not being offered enough money from the lender, you should go to other lenders. Shop around; look at the appraisals; get the best loan available.

Lenders hire appraisers for their value judgment, based on experience, expertise, professional ability. Reputable lenders select appraisers who are qualified and objective. Ask to see the lender appraiser's qualifications (tested, designated member of a professional appraisal society?). Fair, objective lenders employ the services of professional appraisers who represent any one of the major appraisal societies in the U. S. and determine their employment on the basis of their qualifications to perform the particular assignment.

If you hire an appraiser to evaluate the home you propose to buy, you should receive a sound analysis of the home itself (structure, condition, rooms, interior equipment, energy efficient items, etc.) as well as a thorough analysis of the environment (community services such as schools, transportation, fire/police/health protection, shopping areas, sewer/water facilities; cultural and

recreational facilities; related amenities) and a documented statement of the market value of the property. Such an appraisal will be worth the fee you pay for it — and may save you thousands of dollars.

For a free pamphlet giving information on appraising write: American Society of Appraisers, Dulles Int'l. Airport, P.O. Box 17265, Dept. A., Washington, D.C. 20041.

**THE ONE THAT DIDN'T GET AWAY** Terry Cuevas reported catching this seven pound bass from a Hancock County farm pond last week. Displaying the nice sized trophy (or dinner) is his son, Brian.

## OBITUARIES

## MRS. FRANCES DAVIS

Funeral services for Mrs. Frances Davis were at the Morning Star Baptist Church in Bay St. Louis.

Burial was Wednesday at 10 a.m. in Cedar Rest Cemetery in Bay St. Louis.

Mrs. Davis, 87, a resident of Bay St. Louis for 38 years, died Friday.

She is survived by five daughters, Mrs. Maggie Thompson of New Orleans, Mrs. Etta Mae Williams of Bay St. Louis, Miss Anna Mae Davis of New York City, Mrs. Mary Lewis and Miss Ruby Davis, both of Gulfport; two sons, Walter Davis and William Davis, both of Bay St. Louis; two sisters, Mrs. Emma James of Catahoula, Miss. and Mrs. Lucy George of Jacksonville, Fla.; three brothers, Willie Wilkerson of Cincinnati, Ohio; Clifton Wilkerson and Eddie Wilkerson, both of Bay St. Louis; 20 grandchildren; and 16 great-grandchildren.

Baylous Funeral Home in Picayune was in charge of services.

## ROY 'SLEEPY' DEDEAUX SR.

An 11 a.m. Mass for Roy J. "Sleepy" Dedeaux Sr. was celebrated Tuesday at Our Lady of the Gulf Catholic Church in Bay St. Louis, with burial in Garden of Memories Cemetery at Bay St. Louis, died Sunday, Sept. 9, 1979.

Born in New Orleans, he was a lifelong resident of Bay St. Louis.

He was an appliance repairman, a World War II Army veteran and a member of Our Lady of the Gulf Catholic Church, Quartermaster of Veterans of Foreign Wars Post 3253, and a member of American Legion Post 139, both at

## Bay St. Louis.

He was also a charter member of the Disabled American Veterans, Chapter No. 50.

Survivors include his wife, Mrs. Violet Dedeaux; a son, Roy J. Dedeaux Jr., both of Bay St. Louis; three daughters, Miss Terry Dedeaux of New Orleans, Mrs. Patricia Dedeaux Oliver and Mrs. Janice Kingston, both of Bay St. Louis; his mother Mrs. Amelia Dedeaux; a brother, Clois Dedeaux; a sister, Mrs. Helen Murphy, all of Bay St. Louis; and nine grandchildren.

Edmond Fahey Funeral Home in Bay St. Louis was in charge of arrangements.

## MRS. ERAN LADNER

Services for Mrs. Eran Bond Ladner were Tuesday at 10 a.m. at the Winstead Funeral Home in Poplarville, with burial in the Hester Cemetery.

Mrs. Ladner, 73, wife of Norman Ladner and a resident of Route 3, Lumberton, died Sunday, Sept. 9, 1979.

She was born in Pearl River County and was a member of the Oak Hill pentecostal Church in Poplarville.

In addition to her husband, she is survived by three daughters, Mrs. Mildred Davis of Poplarville, Mrs. Myrtis Hendrix of Perkinston, and Mrs. Mae Bangs of Gulfport; a son, Orman Ladner of Gulfport; two brothers, Floyd Bond and Boyd Bond, both of Perkinston; two sisters, Mrs. Myrtle Bounds of Perkinston, and Mrs. Bertha Bosarge of Waveland; 18 grandchildren; and 16 great-grandchildren.

## County millage drops to 65.35 for 1980

By LESLIE WILLIAMS

Hancock County's millage for the 1979-80 fiscal year was approved at 65.35 by Hancock County Board of Supervisors Monday, "3.90 mills less than the previous year," said Hancock County Chancery Clerk John Rutherford.

An additional two mills are levied in the Kiln and Diamondhead First Districts to support those districts.

Two mills finance expenditures of the Kiln Fire Department including maintenance of fire equipment, insurance and other costs.

The Diamondhead District's two mills are being used to finance construction of a fire station, and operating expenses of its fire department.

Rutherford said some 26 mills will provide revenues to the Hancock

County School System and 30 mills

provide income for the county.

"One mill will provide approximately \$48,000," Hancock County Tax Assessor Edward Murtagh explains.

Therefore, some \$3,136,500 should be derived from the 65.35 mills levied against the personal and real property assessed valuation of \$48,000,000.

The clerk explained the drop in the millage rate was primarily due to the retirement of a "short term school loan."

In other action at Monday's board meeting, supervisors hired Bay St. Louis architect Fred Wagner to draft plans and specifications for new buildings for the county sheriff's department and determine a location for those offices.

"We want Wagner to do a sort of feasibility study," Beat Five Supervisor

James Travirca said.

Sheriff Sylvan Ladner said the offices are needed to provide more space and because juvenile prisoners say vulgar words to the female dispatchers who work near the youths' cells.

In other business the board:

Authorized several contractors be contacted and asked to give an estimated cost for temporary repairs to heavily damaged sections of county beach road. The contractors are expected to submit the estimates at no cost.

Accepted bids, previously taken under advisement, for walkie talkies and a "repeater" for approximately \$3,162. The devices are expected to aid Civil Defense communication in the Pearlport area.

Authorized the advertisement for

Bids for the purchase of a half-ton pickup truck for Beat Five.

Approved the low bid by Cataphote of Jackson to paint traffic stripes on several miles of county road at a cost of \$14,632. The stripping is a state-aid project.

Port and Harbor Commission Director Wilson Wehre stated New World Research's findings were "negative." The firm was hired to determine if significant archeological remains existed at the Port Blenville industrial complex near the proposed Borg-Warner plant site.

Set Sept. 17 for the next board meeting.

## Feasibility....

CONTINUED FROM PAGE 1A

rooms and a new media center," Jones said.

"Secondly, as crowded as you are now at Wayland Elementary, you need 14 new classrooms," he continued.

"You could build out north and south as well as building on the playground area," he said.

"Third, an energy conservation plan is recommended for North Bay Elementary," Jones continued.

"With work done on North Bay, we could possibly look at an energy conservation plan. Lower the ceiling, add two ceiling fans in each classroom, and block off some of the windows," Jones recommended.

"Within three years, you could save half of what you spend on heating now," he added.

"At the Junior High School, we recommend you not initiate any major renovations at this time because of the age and condition of the building," Jones told the board.

"If you decide to continue using the school, major renovations will be necessary and very expensive. We predict the school has five to eight years of life remaining in it," he continued.

"It would not be feasible or economical to pour money into the building because of its age, not to mention that there is not much elbow room from what we saw," Jones said.

"At the High School, we recommend you construct a fine arts building, including a small auditorium, a band hall, and a choral music hall," he told the board.

"This is needed, because right now band students have to go to the Junior High and climb three flights up to rehearse," Jones continued.

"I am sure the addition will be a welcome one," he added.

"Finally, we recommend that you consider the feasibility of consolidation," Jones said.

"A new junior high school will need to be built in the south end of the county, and this could be better financed with consolidation," he explained.

"The two existing high schools (Bay High and Hancock North Central) could be used to accommodate grades 10 through 12, and the three elementary schools are promising enough," he added.

Jones said consolidation will be "economical to the two school districts."

Stacy then broke down costs of immediate additions of class rooms at the elementary schools, a new media center, and a fine arts building at the senior high.

Stacy estimated the North Bay class rooms and media center to cover 15,000 square feet, the Waveland class rooms to cover 9,800 square feet, and the fine arts building to take up 10,658 square feet.

He said class room construction is \$30 per square foot, making the total estimated cost of all additions \$1,045,740.

"There is a little variation in class room costs, so the total could be a little more or a little less," Stacy said.

Board Member James Ginn asked if the plan would accommodate the system past the five-year period, since a bond issue will take 20 years to pay back.

"We may face a similar situation in five years and still have 15 years of payments on the bond issue," Ginn said.

Stacy said the proposed construction could be added onto at a later date.

"If you were us, what would you do," Ginn asked.

"At present, the elementary schools are large enough. Consider a junior high school and you will be looking for a bond issue," Stacy replied.

The board thanked the researchers for their work, noting it may recall the trio, if it has any questions.

## News Brief

SAINTS AND SINNERS

The monthly book sale and dinner at the church will be held Sunday, September 16, from 1 p.m. to 4 p.m. at the church.

Waveland Middle School will be closed for the day, September 16, in honor of the book sale.

Waveland Middle School will be closed for the day, September 16, in honor of the book sale.

Dorothy Bielstein, Civil Defense official, checks hurricane preparedness with National Guard Lt. Jay Rutledge and Sgt. Robert Gavagnie

## Hurricane..... CONTINUED FROM PAGE 1A

No pets were allowed in the shelters except seeing-eye dogs, he explained.

"No forced evacuations were effected as of 2 p.m., we're just asking the people to get out in time," Hancock County Civil Defense Director Robert Boudin said.

"If someone wants to come out, we will go in and get them," the director added.

Earlier Wednesday, county supervisors, Bay St. Louis Mayor Larry Bennett, Bay Councilman Thrifley and police and fire department heads from Waveland and Bay St. Louis met with Hancock County Civil Defense workers and made preparations for the storm, including putting the National Guard on alert.

"It's just a matter of waiting now,"

Beat Two Supervisor Alton Kellar said at Civil Defense headquarters.

"We made all the necessary preparations—we can only wait until Fredrick strikes inland now."

As Kellar spoke, hurricane warnings were rebroadcast for the area from Panama City Fla. to Grand Isle, La. A hurricane warning means residents should expect hurricane conditions—74 mph or greater winds, high water and storm tides—within 24 hours.

Civil defense officials said approximately 100,000 persons were being evacuated along the Mississippi Gulf Coast.

A total of 170,000 persons were ordered evacuated in Mississippi, Alabama, Florida and Georgia.

Forecasters warned Fredrick could

be the most vicious hurricane to hit the area since Camille.

Local hurricane preparations included cancellation of classes for the day at all Hancock County schools.

Sea Coast Echo-Editor Joe Pillet reported several students were going door-to-door asking Bay St. Louis residents if they needed any help moving things in preparation for the storm.

South bound traffic on Hwy. 49 was closed about 10:30 a.m. and US-90 and other highways became congested with traffic, as gas lines lengthened.

Fredrick was expected to produce tides 5 to 15 feet above normal along Mississippi waterways and coastline.

## St. Ann's Parish News

A thought for the day from the library of Father Canisius Hayes, pastor St. Ann's Parish

The soul would have no rainbow, had the eye no tear.

St. Ann's Altar Society will hold its monthly luncheon and social at noon Wednesday, September 26, in parish hall. Donation will be \$1.50 per person.

The public is invited.

Installation of religious education program teachers will take place on September 23, 10:00 a.m. at St. Ann's Church.

Tea will be held at 3:00 p.m. at St. Ann's Church, 1000 Highway 49, on Sunday, September 23, according to Rev. Magr. John Scanlon, pastor.

All young people in the parish are encouraged to participate in the youth program.

St. Ann's Home School will hold a Homecoming Dinner on Sunday, September 23, at 6:00 p.m. at the school.

All parents are asked to bring a contribution to the Homecoming Dinner.

## Inflationary increases cited

## Mississippi Power requests rate hike

Mississippi Power Company, citing sharp increases in expenses brought on by inflationary pressures, Monday morning filed a notice of change in retail electric rates with the Mississippi Public Service Commission.

Company President Victor J. Daniel, Jr., announced filing of the proposed rates, which will become effective October 10, 1979. The new rates are expected to produce an estimated 11.3 percent increase in retail revenues, or \$23.9 million, during the first 12 months they are in effect.

Daniel said that the proposed retail electric rates comply with the price guidelines established by Executive Order of the President of the United States.

"Mississippi Power Company's base rates for electric service have not increased since December, 1975, when the present rate schedules were placed in effect. In the ensuing four years, severe inflation continued and has now returned to double-digit levels.

"Revenues from present rates are inadequate to maintain reliable service to our customers and meet their increasing requirements and those of the growing economy and population in our service area," he stated.

Daniel pointed out that since Mississippi Power Company filed its last rate request almost four years ago, the company's investment in new facilities necessary to provide reliable electric service has increased almost \$139 million, or 27 percent, yet its

earnings today are some 14.7 percent less than they were at the end of 1975.

"Mississippi Power Company's present return on equity or risk capital invested in the business is less than 6.7 percent, only slightly higher than interest paid on a passbook savings account. By contrast, the company must pay 12 percent interest on money it borrows from banks. The 6.7 percent return is far too small to attract new capital, and coverages are too low to permit the sale of some types of securities," he stressed.

"We take no comfort from the fact that even this rate adjustment, Mississippi Power Company's rates will still be among the lowest in the nation. It is never pleasant to raise rates, but we could not postpone this request any longer. Inflation is adversely affecting the company just as it is the consumer, and the cost of nearly everything involved in providing electric service keeps going up."

Daniel concluded by emphasizing, "If Mississippi Power Company is to continue providing reliable electric service to customers throughout southeast Mississippi, our rates must be sufficient to offset constantly increasing expenses and enable us to attract capital needed to meet our service responsibilities."

Mississippi Power Company, with headquarters in Gulfport, provides electric power to over 155,600 customers in 23 southeast Mississippi counties.

WINS EAGLE AWARD—Theodore (Ted) Longo, 16, St. Stanislaus High School junior, recently received the medal symbolizing Eagle rank in Boy Scouts of America. He is a member of Troop 219 which is sponsored by the Waveland Fire Department. Receiving the medal at the presentation ceremony Sept. 11, Waveland Civic Center are his parents, Mayor and Mrs. John Longo Jr. (Photo by Bob Hubbard)

## MISSISSIPPI FARM BUREAU FEDERATION AG-FORESTRY MUSEUM POTENTIAL

At present there are some 4.2 billion people in the world increasing at the rate of 70 million annually or 192,000 daily. Although world population growth has begun to slow down, the statistical trend is such that it will be awhile before an anticipated halt.

Already the existing population has begun to put unachievable demands on the productive capacity of many agricultural and forestry systems as currently managed and both the agricultural and forestry sciences will be challenged to levels of achievement not yet on the drawing boards.

Mississippi appears, from a renewable resource standpoint, to be positioned in the center of much future development which has a significant bearing on the importance of the Mississippi Agricultural and Forestry Museum recently begun in this state.

While the word 'museum' may often connote a storage and display facility for old things, Mississippi's developing museum is planned to be more than a dam preventing the receding away of countless physical objects and methods of the past, but rather a channel through which this state's newest agricultural and forestry products may be promoted by the millions of visitors to the Jackson site or persons out in the state, nation, and world that will be reached by mobile programs.

For years now this museum has been in the planning stage, utilizing some of the most competent consultants to be found in the nation. A committee of state historians put their heads together to determine the best way to present the stories of past, present and future development of this state's resources.

Ground recently was broken on a spacious site along Jackson's Interstate complex for the main exhibit building, and this fall will see a statewide drive begin for funds that will be needed to supplement a legislative appropriation to insure that the museum realizes its vast potential.

In concept, the museum, through the latest techniques of exhibition and audiovisuals, will lead visitors through past development in three stages—those afforded by the river system first, then the railways, and lastly the roads and highways.

The collection of artifacts, machinery, and buildings representing these periods was initiated a number of years ago by the state's department of agriculture and commerce, and much of this collection will be used in both the static and changing exhibits.

Currently the museum specialists are scrutinizing the state for authentic buildings that best represent the main components of our rural villages of the past. The separate actual buildings—such as a country store,

blacksmith shop, doctor's office, etc.—will be relocated on the rural village site adjacent to the museum and put into operation employing craftsmen who will do their thing before the eyes of the visitors.

Certain crafts made in the village will be sold through the general store as additional revenue for the museum.

The third main feature of the museum will be an arboretum operated on the grounds showing to visitors all of the trees native to the state with information stations to acquaint the public with the relationship of tree types with soil or other habitat requisites.

The museum has acquired the state's last commercial distillery of naval stores which converts pine sap into such products as turpentine, pine oil or pitch. Saw and planing mills on the site will demonstrate the conversion of logs into finished lumber products.

While certain benefits of the museum will assuredly go to Jackson businesses, it is also true that the museum's promotional programs will afford marketing opportunities for the entire state. Its more obvious virtue of preservation appears perhaps less important than future economic opportunities for the entire state.

Plan No. 263

## HOUSE PLAN

This country-style home has many appealing features.

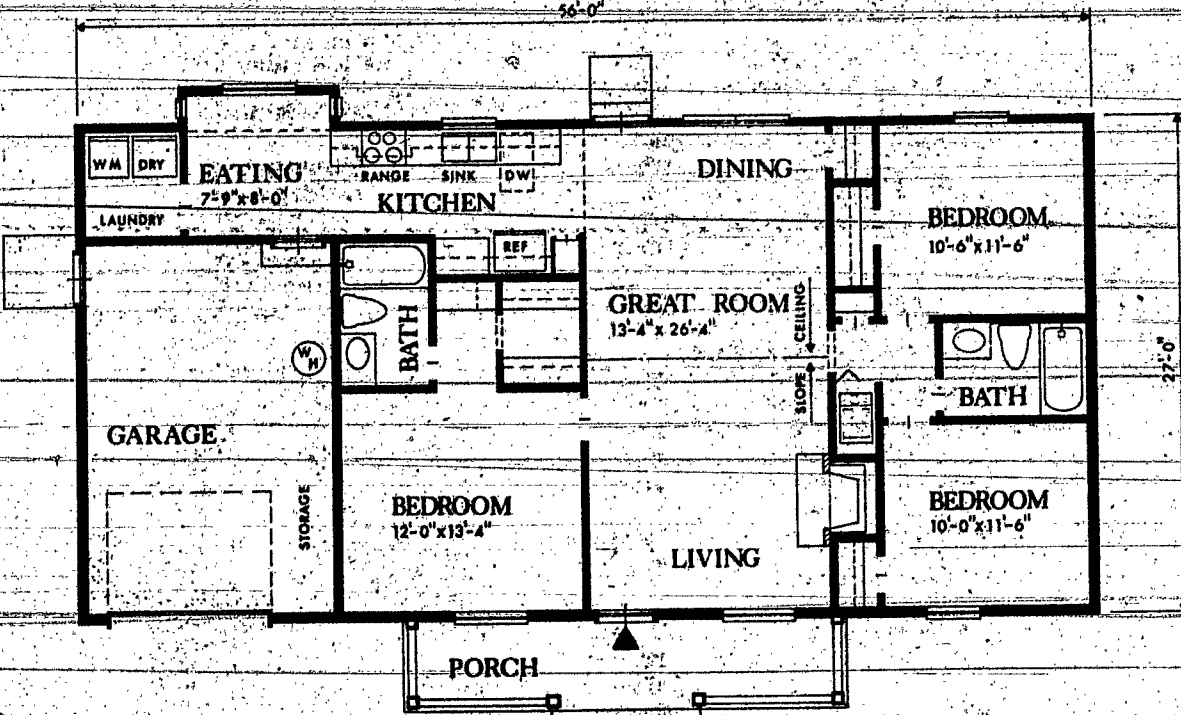

From the "country" front porch with wood posts and rails, you enter the great room to find both a fireplace and sloping ceiling awaiting you.

Another interesting idea: the master bedroom is located to the left of the great room and the other bedrooms to the right.

The kitchen, with all built-in appliances, and a separate family eating room overlooking the backyard, are located to the rear of the home.

Design number 263, the home has 1,242 square feet of living space, 287 square feet in the garage and storage area and the 97 square foot front porch.

Complete blueprints are available from E. A. Myers, Residential Designer, 1400 Scott Boulevard, Decatur, Georgia 30030. This plan appears in the sixth edition of the company's plan book.

## Sears recalls 19-inch TV's

Sears, Roebuck and Co. has announced a repair program to correct a potential fire hazard in 21,000 of its 19-inch portable color television sets.

The program is being conducted in cooperation with the U.S. Consumer Product Safety Commission.

The sets were manufactured with an electrical resistor which may overheat, possibly causing an internal fire which could spread to other com-

bustible materials. The sets were sold from 1973 through 1975.

Sears has received consumer reports of five fires in the television sets. No injuries have been reported.

The sets were sold nationwide under the "Sears" brand name for approximately \$190. They can be identified by one of the following model numbers or

the back of the cabinet: 564.41990300, 564.419913000, 564.41991302 or 564.41991303. No other sets are involved.

Consumers should contact their local Sears store or service center to arrange for free repairs.

To verify model numbers, consumers also may contact CPSC's toll-free Hotline at the following numbers: in the Continental U.S., dial 800-638-8326; in Maryland, 800-492-8363; and in Alaska, Hawaii, Puerto Rico and the Virgin Islands, 800-638-8333.

## Annual muscular-dystrophy report details 'year of advances'

Announcing significant progress in every area of its activity, the Muscular Dystrophy Association today released its 1979 Annual Report.

Mr. Tom Faralli, president of MDA's Mobile-Gulf Coast Chapter, said the Report shows that last year MDA provided more medical services than ever before to patients suffering from neuromuscular diseases, adding: "MDA's programs were expanded to encompass a total of 38 neuromuscular diseases and Association-supported research seeking the causes of and cures for these afflictions increased at an unprecedented rate."

MDA currently funds over 700 basic and clinical research projects—200 more than in 1977, making the Association far and away the leading sponsor

of neuromuscular research in the world, Mr. Faralli said. The Report also details the unprecedented expansion of MDA's free medical services for which the national voluntary health agency expended almost \$28 million last year.

This record allocation represents an increase of nearly \$7 million over the previous year, Mr. Faralli reported. MDA's comprehensive program of patient care included free diagnosis and therapy at the Association's 216 clinics, orthopedic equipment and other patient services such as recreation and transportation.

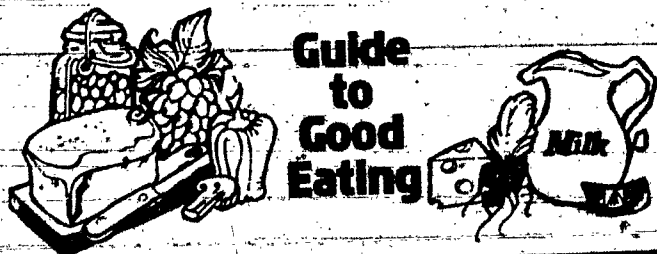

Sylvester L. (Pat) Weaver, Jr., who served as national MDA president during the period covered by the report, pointed out that "millions of Americans have made these

accomplishments possible" and expressed the Association's gratitude for the "unparalleled generosity in response to MDA's appeal shown by hundreds and thousands of concerned people from every age group, every area of the country, and every walk of life."

The Report indicates that MDA's total income for 1978 was \$68,501,619, 94.4 percent of which was derived from individual donations. 83.5 percent of MDA's expenditures in 1978 was allocated for program services, including research, medical services, professional

education and training, and public health education; only 13.3 percent went for fund raising and 3.2 percent for administration. In this connection, Mr. Faralli recalled that a recent newsweek survey found that these "overhead expenses" totaling (16.5 percent) were the lowest among the agencies the magazine reported that raise funds independently.

Copies of MDA's 1979 Annual Report can be obtained free of charge by writing to the Muscular Dystrophy Association, 574 Ashlea Road, Suite 124, Mobile, Alabama 36609.

**Guide to Good Eating**

### Ultra-High Temperature Milk

You have been backpacking for a week in a remote mountain area and sit down to enjoy a carton of milk with your meal even though you have not been near a refrigerator or ice chest in a week. You forgot to buy the milk you need for your favorite recipe, so you simply reach into the cupboard and use the carton of milk you bought over a month ago.

Science-fiction? No, science fact. It is possible to produce a carton of milk, with the qualities of fresh milk, that can be stored without refrigeration for several months. This type of milk is called ultra-high temperature (UHT) milk.

With the UHT process, milk is heated to temperatures above 135 degrees C (275 degrees F) for 2 to 4 seconds. The UHT milk is rapidly cooled and packaged in special plastic-coated, foil lined cartons. This sterile milk does not need to be refrigerated during transportation or storage, and the shelf life is extended up to 3 months. The nutritive value of UHT milk is similar to regularly pasteurized milk.

UHT milk is very popular in Europe where per-capita milk consumption has increased because UHT milk can be distributed to areas without refrigeration. In the U.S., UHT milk is mainly used by the military and for emergency food supplies. UHT milk is also used by the food service industry and for home use.

UHT milk has not become popular in the U.S. because it often has a cooked flavor. However, research indicates that an enzyme from whey may be added to UHT milk to successfully modify these flavor differences.

It costs 20 to 50 percent more to process and distribute regularly pasteurized milk than UHT milk. These savings are due to reduced storage and delivery costs, less spoilage, and energy savings from the use of special packages and reduced refrigeration needs. If taste differences can be overcome, U.S. processors may begin to make UHT milk available for your use and convenience. (PRN)

READY FOR THE GAME-Pearl River junior College's cheerleaders will be leading the Wildcat enthusiasm in Poplarville Saturday night against the Holmes Bulldogs. In front is Suzanne McSwain, from Bogalusa. Making up the second row are Mary Brooks, Poplarville; Mark Proulx, Bay

St. Louis; and Karen Smutney, Piquette. Standing from left are Terrie Harriel, Poplarville; Terrie Lou McDonald, Lambert; Ann Odom, Poplarville; and Lynette Latche, Poplarville. The wildcats' game starts at 7:30 p.m.

## Sears recalls 19-inch TV's

Sears, Roebuck and Co. has announced a repair program to correct a potential fire hazard in 21,000 of its 19-inch portable color-television sets. The program is being conducted in cooperation with the U.S. Consumer Product Safety Commission.

The sets were manufactured with an electrical resistor which may overheat, possibly causing an internal fire which could spread to other com-

bustible materials. The sets were sold from 1973 through 1975.

Sears has received consumer reports of five fires in the television sets. No injuries have been reported.

The sets were sold nationwide under the "Sears" brand name for approximately \$190. They can be identified by one of the following model numbers or

the back of the cabinet: 564.41990300, 564.419913000, 564.41991302 or 564.41991303. No other sets are involved.

Consumers should contact their local Sears store or service center to arrange for free repairs.

To verify model numbers, consumers also may contact CPSC's toll-free Hotline at the following numbers: in the Continental U.S., dial 800-638-5326; in Maryland, 800-492-8363; and in Alaska, Hawaii, Puerto Rico and the Virgin Islands, 800-638-5333.

## Annual muscular-dystrophy report details 'year of advances'

Announcing significant progress in every area of its activity, the Muscular Dystrophy Association today released its 1979 Annual Report.

Mr. Tom Faralli, president of MDA's Mobile-Gulf Coast Chapter, said the Report shows that last year MDA provided more medical services than ever before to patients suffering from neuromuscular diseases, adding: "MDA's programs were expanded to encompass a total of 38 neuromuscular diseases and Association-supported research seeking the causes of and cures for these afflictions increased at an unprecedented rate."

MDA currently funds over 700 basic and clinical research projects—200 more than in 1977, making the Association far and away the leading sponsor

of neuromuscular research in the world, Mr. Faralli said. The Report also details the unprecedented expansion of MDA's free medical services for which the national voluntary health agency expended almost \$28 million last year.

This record allocation represents an increase of nearly \$7 million over the previous year, Mr. Faralli reported. MDA's comprehensive program of patient care included free diagnosis and therapy at the Association's 216 clinics, orthopedic equipment and other patient services such as recreation and transportation.

Sylvester L. (Pat) Weaver, Jr., who served as national MDA president during the period covered by the report, pointed out that "millions of Americans have made these

accomplishments possible" education and training, and expressed the Association's gratitude for the "unparalleled generosity in response to MDA's appeal shown by hundreds and thousands of concerned people from every age group, every area of the country, and every walk of life."

The Report indicates that MDA's total income for 1978 was \$68,501,619, 94.4 percent of which was derived from individual donations—83.5 percent of MDA's expenditures in 1978 was the Muscular Dystrophy Association, 574 Azalea Road, Suite 124, Mobile, Alabama 36602.

Guide to Good Eating

### Ultra-High Temperature Milk

You have been backpacking for a week in a remote mountain area and sit down to enjoy a carton of milk with your meal even though you have not been near a refrigerator or ice chest in a week. You forgot to buy the milk you need for your favorite recipe, so you simply reach into the cupboard and use the carton of milk you bought over a month ago.

Science fiction? No, science fact. It is possible to produce a carton of milk, with the qualities of fresh milk, that can be stored without refrigeration for several months. This type of milk is called ultra-high temperature (UHT) milk.

With the UHT process, milk is heated to temperatures above 135 degrees C (275 degrees F) for 2 to 3 seconds. The UHT milk is rapidly cooled and packaged in special plastic-coated, foil lined cartons. This sterile milk does not need to be refrigerated during transportation or storage, and the shelf life is extended to 6 to 12 months. The nutritive value of UHT milk is similar to regularly pasteurized milk.

UHT milk is very popular in Europe where per capita milk consumption is much higher than in the United States. In fact, the U.S. Food and Drug Administration has approved UHT milk for sale in the United States since 1961. In Canada, UHT milk has been sold since 1951. In the United States, UHT milk is sold in a variety of sizes and flavors, including whole, low-fat, and non-fat. It is also available in a variety of packaging, including 1/2 gallon, 1 gallon, and 2 gallon cartons.

UHT milk has not become popular in the U.S. because it often has a cooked flavor. However, research indicates that an enzyme found in milk can be added to UHT milk to successfully modify these flavor differences.

It costs 20 to 50 percent more to process and distribute regularly pasteurized milk than UHT milk. These savings are due to reduced storage and delivery costs, less spoilage, and energy savings from the use of special packages and reduced refrigeration needs.

If taste differences can be overcome, U.S. processors may begin to make UHT milk available for your use and convenience. (PRN)

## Hawks rebound

# Hancock invades Eagles' nest in come-from-behind victory

By RICH ADAMS  
Sports Editor

The Hancock North Central Hawks called on their come-from-behind spirit Saturday night as they rallied from a seven-point deficit in the second half and defeated the Our Lady of Victory Eagles 21-14.

We controlled the football in the second half and threw some really good

blocks," HNC Head Coach Irvin Favre said following the game Saturday.

"During half time when we were behind by seven points I told the players that it is a long way back home," Favre added.

The Hawks were held scoreless during the first period during which their only two scoring threats were thwarted by interceptions and a key interception.

HNC won the toss and elected to receive, Byron Ladner taking the kick to the 43

yard line.

First-year quarterback Bobby Devaughn was sacked by the Eagle's Robert Harris, and then gained three yards on an option sweep left.

But the Hawks were forced to punt to end the series, the Eagles taking over on their own 31 yard line.

The Eagles were also unable to move the ball, and lofted a punt which rolled to the HNC three yard line.

Fullback Willy Santiago took an 11 yard romp to lead the Hawks out of danger and pick up a first down, but on a fourth-and-eight situation the HNC eleven were forced to punt from deep in their own territory.

A penalty on the punt against OLV gave the Hawks possession on their 40, and on a second-and-six situation Devaughn let go with a pass intended for End Rodney Necaise which was snatched in mid air by OLV's Paul Thompson.

The interception placed OLV on their own 30 yard line, and a series of runs executed by Quarterback Darryl Delmas set up the only score of the first half.

Thompson received a pitch-out from Delmas and threw a 40 yard bomb to Robert Dubose to place the ball on the HNC one yard line.

Delmas kept the ball on the next play as he skittered across the line to score with 10:20 remaining in the half.

The conversion attempt was successful, and the Eagles led 7-0.

Another Devaughn pass was picked off in the second stanza, an aerial intended for George Moore which was grabbed by Roy Martin of OLV.

Delmas attempted a pass to Tim Krebs on a fourth down situation, but it fell incomplete to give HNC the ball.

A pass interference call against the offense during the interception placed the Hawks on their own 45, and Devaughn began leading the way to paydirt.

Santiago executed a number of running plays, highlighted by an 18 yard romp to the OLV 23 yard line, but with less than one minute to play the Hawks were

THURSDAY, SEPTEMBER 12, 1979-13

By RICH ADAMS  
Sports Editor

Hancock North Central Hawk Head Coach Irvin Favre has made notable changes in his defensive secondary in an attempt to thwart a tough passing offense expected from Forrest County when they meet the Hawks at HNC stadium Friday night.

The Hawks are 1-1 for the season, hosting their first home game of the season Friday fresh from a win against Our Lady of Victories last Saturday.

"I don't know if we can beat them," Favre said Tuesday.

"I don't think we have been playing to our best capabilities or we haven't played a good defensive secondary," the head coach continued.

"Forrest is a big team with a big passing game. They usually throw 30 or 35 passes each game," he added.

Forrest lost their opener against Stone County two weeks ago, and were unsuccessful against 18th ranked West Marion last Friday.

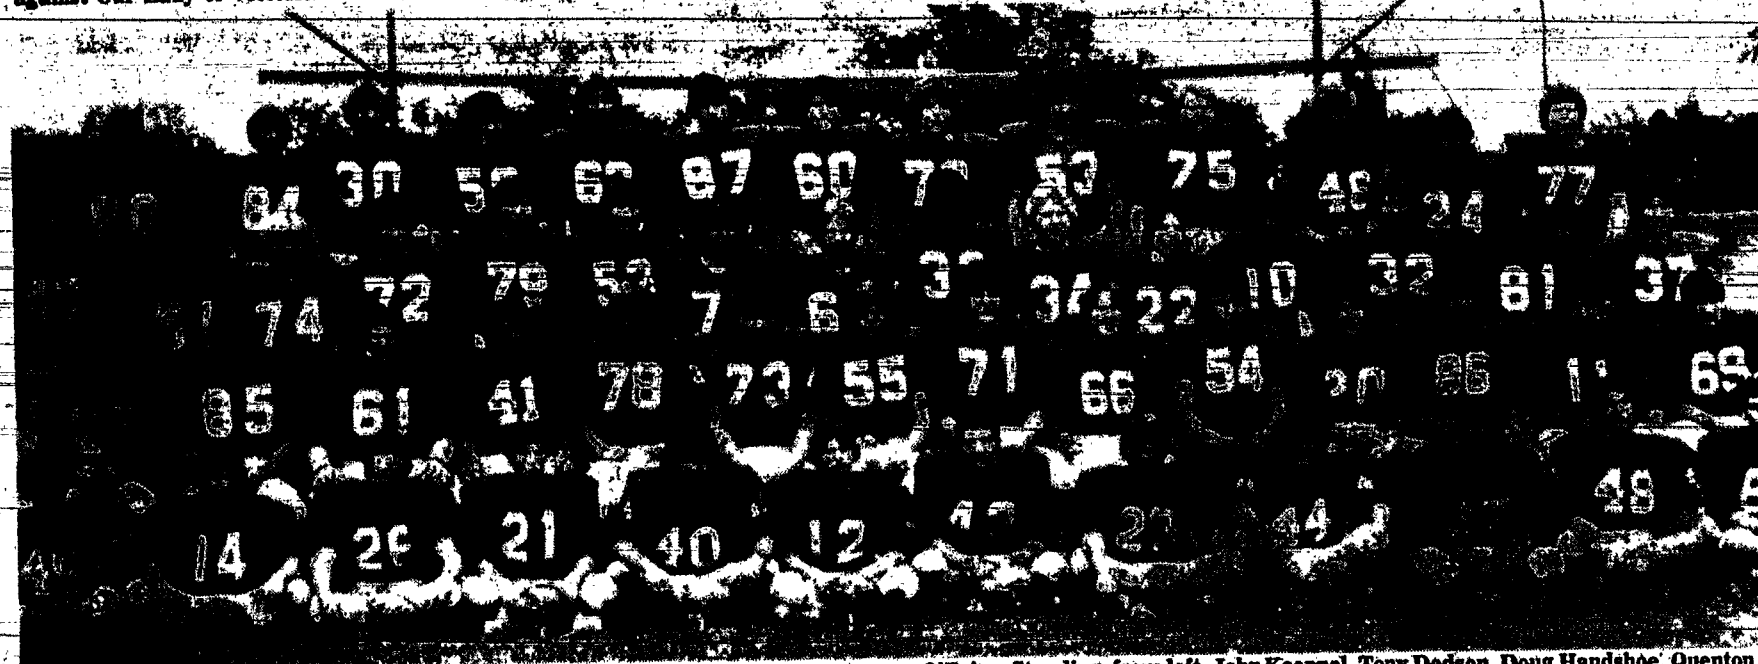

Favre said the game promises to be a physical contest, the first meeting of the two teams in years.

"The Apache Conference is a real good conference...we will need to play a good football game," he said.

Favre said he plans to place Quarterback Bobby Devaughn, Split End Byron Ladner, and Running Back Lloyd Henry in the defensive backfield to add speed to the passing secondary defense.

Rene Baum and Willy Santiago will move to cornerback positions and create a

Not present in the photo are Mike Prendergast, Mark Lichtenstein, and Rodney Lacoste. (Staff photo-Rich Adams)

## St. Stanislaus Rock-A- Chaws

By RICH ADAMS  
Sports Editor

The St. Stanislaus Rock-A-Chaws open season Friday night against Pearl River Central, and first-year Head Coach Barry Jones feels his Rocks will comprise a winning team this year.

The SSHS squad won the Spring Football Jamboree earlier this year, guided by Quarterbacks Gary Sotak and Joe Gex.

"I hope we stay healthy and stay in the middle of action. We have a good ball club this year," Jones said Tuesday.

"We have a solid defense and believe we have a winning ball team," he added.

Pearl River Central was defeated by the Rocks in a 1978 season game.

Coach Jones said the day team should be ready to play Friday night.

"Pearl River is a larger team than we are, and a good ball club," Jones said.

"They have a solid defense. All defensive players are able to line up, very solid," he continued.

"Pearl River has the game advantage that one victory will give them a lot of momentum," he added.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

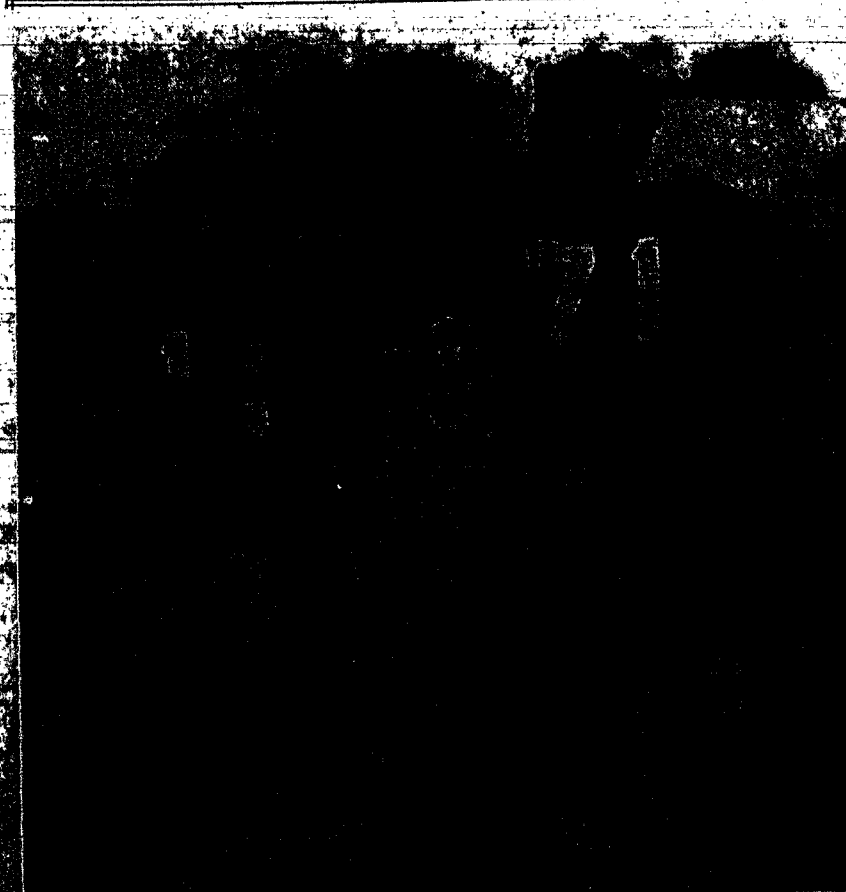

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

## Bay Sr. High

# TIGERS

By RICH ADAMS  
Sports Editor

The Bay High Tigers are coming into Friday's contest against East Central "with confidence" following last week's defeat of Stone County, but Head Coach James "Snuffy" Smith is keeping that confidence to a limit.

"As far as potential, I feel we have the better ball club," Smith said Tuesday.

"We are going into the game with confidence, but we are not going to beat Stone County, but we must take care not to become overconfident," he continued.

"Anything is possible in a ball game. To us, any game we play in we are the underdogs. We have been labeled a traditional loser," the first-year head coach said.

"If we stick to what we did last week a ground game, I believe we can win," he added.

Last week against Stone County, Bay Coach James Smith found a soft spot in the Tiger's armor and ran for more than 100 yards, scoring both Bay Tiger touchdowns.

After the game, Stone gave us an opportunity to run the ball. We will take advantage of that opportunity," Smith said.

"The offense is going to take advantage of defensive weaknesses... we continue to be confident," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

"We are going to play to win, and we are going to play to win, and we are going to play to win," he said.

## Bay High

CONTINUED FROM PAGE B1

ball," he added. Now that Smith and the Tigers have won their first game of the season, he feels team support at their home game this week will be increased. "I feel we had quite a bit of support when we went against Stone County. Now I am looking forward to our first home game of the season," the Tiger skipper said. "I believe we will have more supporters at Friday's game, weather permitting," he continued. "I feel the support is good. The people in the stands support the Tigers, and that adds to the possibility of winning and gives us the small edge against the opposition," he added. "We have to believe we are the better ball club. We need confidence, and we will be out there giving 100 percent," Smith said. Although East Central Head Coach Robert Walker said his squad is "slow and little," a look at the probable starting lineup reveals an average of a 182-pound offensive line and a 180-pound average on the defensive line. East Central lost its opener against d'Iberville last week in a 41-0 shut out, but nearly scored on a 60-yard run which was called back for a penalty. Walker said his rookie quarterback has "the making of a good passer," but added he could not do much against the tough Warrior defensive secondary. "The game will be a physical, hard-hitting match. Our boys want to come back, but after Bay High's win, the Tigers will be sky high," he noted. The game begins at 7:30 p.m. at Tiger Stadium Friday.

HNC RUNNINGBACK Lloyd Henry escapes the grasp of Our Lady of Victories' Henry Lawrence as he rounds the line in a gain during a contest in Pascagoula Saturday. The Hawks won their first game of the season 21-14 after suffering a loss to Pass Christian Aug. 31. Henry scored two of the three HNC touchdowns. (Staff photo-Rich Adams)

## HNC-OLV

CONTINUED FROM PAGE B1

penalized 15 yards for having an illegal receiver downfield. On a fourth-and-24 situation, Devaughn completed a flea flicker to Halfback Lloyd Henry, but the distance was not enough for a first down and the Hawks lost the ball on downs with 18 seconds remaining in the half. On returning after half time, a new HNC squad seemed to appear and scored after dominating the ball for nearly four minutes. Hancock was given the ball after an OLV pass on a fourth-and-one situation failed, and combinations of Devaughn, Henry, and Santiago runs took the ball downfield. Henry ran for a gain of 13 and a first down, and then Devaughn kept the ball on a second and nine situation and made the first down by inches, placing the ball on the five yard line. A facemask penalty by OLV moved the pignskin to the 2.5 yard line, and Henry ran the ball over the middle with 3:59 remaining in the third period. Byron Ladner's conversion attempt was straight and true, and the Hawks were back in the game with a 7-7 stalemate. Hancock got their second scoring opportunity moments later when a Delmas to Krebs pass was picked off by Henry to give HNC a first down on the OLV 41 yard line. OLV was penalized for holding, and one play later Henry swept around the left side of the line for a 38 yard touchdown with 39 seconds remaining in the third stanza. Ladner kicked another conversion to put the Hawks in front 14-7. In the fourth quarter, HNC was moving downfield when Moore fumbled the ball on the OLV 39 yard line, and Roy Martin landed on the ball for the Eagles. The Hawk defense tightened up and allowed little movement of the ball, and OLV was forced to punt. A penalty called the ball back and gave the Eagles another chance to run, but Paul Thompson fumbled the ball and tackle A. Holden recovered for the Hawks. Henry, Devaughn, and Santiago again combined to carry the ball in for paydirt, this time the touchdown coming on a four yard run by Santiago with less than a minute remaining in the final period. OLV got a final chance to score in the fourth period as Krebs took over the signal calling duties and went to the air. He completed a 37 yard aerial to Delmas, and then tossed a 28 yard pass to Craig McIntosh with one second remaining on the clock to score. The point after was good, but the Hawks remained victors, 21-14. "This was a typical HNC-OLV game," said Eagle Head Coach Bragg Moore as he led his squad to the locker room. Favre said his squad was confused in the first half when the OLV team used a different defensive line-up than they used in previous games. "OLV did a good job," Favre said. "We did a real good defensive job, and it feels good to win," the head coach said after losing his first outing of the season to the Pass Christian Pirates Aug. 31. The Hawks missed the short yardage running of Fullback Larry Peterson, who is out with a hairline fracture in his leg. Favre said Peterson will be back in action in two weeks, however. The Hawks meet Forrest County at home Friday at 7:30 p.m.

## Hawks

CONTINUED FROM PAGE B1

five-man pass defense. "We are placing six men against the running game, which is almost an invitation for Forrest County to run against us," Favre said. "We have the people to do the job against a passing game if they do the job right," Favre said. "We haven't really played a good pass defense game yet, and we have mental lapses where they can pass against us," he added. "We made the changes we had to. We need the passing secondary," Favre said. Favre had praise for Santiago and Henry, who teamed with Devaughn in the OLV contest to gain over 155 combined yards. "They worked hard. I am proud of my halfbacks," Favre said. "They are both fast and strong," he added. He also commended his offensive center, Junior Ernest Lee, for his fine blocking against the Eagles. The Hawk skipper last week returned Byron Ladner to the split end position, the slot he held prior to being relocated at a halfback position at the beginning of the season. Forrest County Head Coach Davis Wilson said his team is "struggling" right now with an 0-2 record, but added his players are ready for a win. "We haven't quite gotten our offense going yet, but we hope to get it rolling this week at Hancock," Wilson said Tuesday. He said he has two key running backs returning from the injured list, John Warble and Mark Anderson, who he hopes to get some action from. Wilson is in his first year as Forrest head coach and hopes to get his squad generated more toward a passing game. He feels, however, that he will have problems running against the wishbone of Fenel of Hancock North Central. "We faced a power 'I' against West Marion, and we are going to have to work on problems we will face against the wishbone," he said. Friday's game begins at 7:30 p.m. at Hawk Stadium.

## BOATING TOPICS

by Bob Brewster

MERCUISER OUTDOOR CONSULTANT

LATE SEASON BOATING

There's usually plenty of fine

boating weather left after Labor

Day signals the official end of

summer. In many ways it is an excellent

boating, sometimes really the

best of the year. The sun isn't so hot, many

insects start to disappear, the

air is brighter and clearer, and

midsummer's mugginess and

thunderstorms have diminished

markedly. There's less traffic on the

water, so you can relax more and

enjoy the freedom that comes

when operating on wide-open,

clear waters. Due to the appreciable drop-

off in the volume of business

and the return of young people

to school and college, many

boatyards can no longer keep

full-time attendants on their gas

docks. So gas stops might take longer,

despite the reduced amount

of water traffic. And once in a while, you'll

find that a gas dock is only open

on weekends.

# SIDELINE SYNOPSIS

By Rich Adams  
Sports Editor

James 'Snuffy' Smith's positive psychology, stressing the belief in winning and team support, seems to have worked last Friday as the underdog Bay High Tigers upset a lot of people in defeating Stone County.

It was Smith's first game as head coach of the Tigers, and with time the squad should pick up confidence and momentum to give teams in the Pascagoula River Conference a tough time in football action.

Bay Quarterback Chuck Brown was impressive with his sweep, and Tomcat's defensive line, and gained some 100 yards against the Hawks defense.

The Tigers have a challenge tomorrow night as they enter into a match against the East Central defense, with a defensive line averaging 180 pounds or so.

Let's just hope the Tigers are not afflicted with a case of over-confidence, rather just enough to keep that winning attitude.

Vanceleave pulled an upset against Pass Christian last week, defeating the Pirates for the first time in five years.

The Pirates are off this week, enabling second-year Head Coach Bob Lumpkin to drill them in their weak areas and hopefully give them time to recover from last week's loss.

The Pass eleven will prevail in the

when they travel to d'Iberville and face the monster-man powerhouse of the Warriors.

That contest promises to be a very physical meeting, and Pass Christian will be truly tested during that game.

The St. Stanislaus Rock-A-Chows and Head Coach Barry Jones enter the season on their maiden voyage this week traveling to Pearl River Central for their opening game.

The Rocks were county champions during the Spring Jamboree and should match promise as they defeated the Hawks and Tigers.

Quarterbacks Joe Gex and Gary Brown will be controlling the squad, and running backs Keith Pfister, Scott Sasser, and Perre Cabell will offer passing support.

Sasser was outstanding last year as a running back, and I look forward to his talents to lead the SSHS crew to a high spot in the FRC standings.

The Hawks host their first home game Friday, meeting a yet winless Forrest County in Hawk Stadium.

Hancock handily disposed of Our Lady of Victories last week, Bobby Devaughn, Willy Santiago, and newcomer Lloyd Henry combining in some very excellent gains.

That week, in an attempt to thwart an offensive passing offense by the Forrest County, Head Coach Irvin Favre had a defensive safety position.

Devaughn, Byron Ladner, and Favre in defensive safety positions and running backs Haum and Santiago to the back position.

Favre is apprehensive about the game, knowing his defensive secondary will have to take on a team with a primary passing game.

I predict the Hawks will prevail in the

## 23. Cards of Thank

The sponsors of the benefit dance given for LEON LEE FAMILY would like to thank all who donated time, donations, also special thanks to Band members.

Mr. and Mrs. Russell Lafontaine  
Mr. and Mrs. Dale Bilbo  
Mr. and Mrs. Richard Wingham  
9-13-pd

I would like to take this means of expressing my sincere appreciation and heart-felt thanks to Edmond Fahey Funeral Home, Masonic Lodge No. 429 F&AM, Father Kavanaugh, Mayor John Longo, Barbara Rappold, Mayor Larry Bennett, and his sister.

Special thanks to my brother, sisters, sisters-in-law, brother-in-law, nieces and nephews and friends who helped in anyway during the death of my son Curtis R. (Chopper) Holman, Jr. I would also like to thank everyone for the food, masses, cards and beautiful flowers. I will always be grateful to everyone for their help. God bless each and everyone.

Mrs. Helen Holman  
9-13-ps

## 24. In Memoriam

## IMMUNITY OF TERRIK ZENGARLING

September 12, 1978  
There is born in every woman, a certain fear That the Lord will take a loved one, dear.  
And so it happened that terrible night,  
The tragedy that confirmed a Mother's fright.  
The lonely month have turned into years.  
I still find it hard to hold back the tears.  
It's sad to think that you'll never grow old.  
That's the best years, or so I've been told.  
There's only a memory to say you were here,  
And a terrible need to hold you near.  
If only we could talk and visit awhile,  
And it would mean so much to see you smile.  
I still feel your presence as though you were here.  
Your room is the same as you left it dear.  
There is a special place for you in my heart,  
You are with me dear, in my every thought.

Sadly missed by  
Mother, Father, Brothers  
Sisters and Grandmother.  
9-13-pd

IN LOVING MEMORY OF  
OUR SON AND BROTHER  
KERRY WAYNE MALLEY

On his birthday  
September 14, 1979

Darling today in your birthday  
Darling what a big boy you would have been if the time wouldn't have come that God called you away.  
Darling, God only knows how much we miss you for that was always a special day for all of us.  
God bless him home, he was his will.  
His memory is as dear to us as in the hour of prayer.

Sadly missed by  
Mother, Father, Brothers  
Sisters and Grandmother.  
9-13-pd

## ANNOUNCEMENTS

## 24. In Memoriam

## IMMUNITY OF LEROY WARD

Died September 12, 1978  
No further away than a picture.  
A smile or remembered phrase  
Our loved one lives in memory. So close in so many ways.  
We miss you still.  
We always will.

Sadly missed by  
Wife, Clara  
Daughter, Annette and  
Son Tommy.  
9-13-pd

with two rookie quarterbacks, Douglas Dickinson and Greg Williams. He has only one returning starter, Leroy Reed. Williams is in his second year as head coach of the Junior Tigers. The Bay Junior High squad meets East Central away from home tonight at 7 p.m.

end, however, and defeat the Forrest County team with the motivation from last week's victory.

The Tigers, also riding high on a win, will take a victory in the East Central contest, providing the over-confidences do not get to the squad.

The Rocks, debuting for the 1979-80 season, should shine and take their opener for a victory.

All contests promise to be hard-hitting games and should be fine spectator events.

# Hancock public hospital keeps abreast of area needs

By Joe Pilet  
Growth means more than increasing in size, and Hancock General Hospital in Bay St. Louis is growing through the constant addition of increasingly sophisticated professional services to the county's residents.

A plaque displayed on the wall of the entrance foyer reads: "Established in 1937. Built 1960. Dedicated to serve humanity."

The hospital was established in October, 1937 on Carroll Avenue in a building donated by the Kings Daughters and Sons, who had operated a hospital here for 37 years.

The present facility on Dunbar Avenue was dedicated May 28, 1960, made possible a county bond issue along with federal and state assistance. Operating a 24-hour hospital is complex business and growing more so each year with greater developments in

medical knowledge and scientific skills, according to Hancock General Administrator Harry Gilmore, Jr.

To trace the "growth chart" of Hancock General, one might consider that from initial complement of six doctors in 1930, the hospital now operates with a seven-member medical staff and 14 consulting physicians.

Physicians include: Drs. Erlinda Alcala, Sidney A. Chevis, Joseph R. Lee, John B. Levens, Helen McGehee, John D. Rutherford and Marion J. Wolfe, who do everything from stabilizing accident victims, performing surgery, and delivering babies, to treating heart and kidney disorders and the multitude of diseases that plague mankind.

In addition to the regular staff, consulting physicians providing services when needed include: Doctors H. S. Barrett, R. L. Brown, G. W. Byrne, M. L. Dodson, W. E. Griffith, D. A. Hopkins, W. W. Lake, H. A. Maggio, J. H. Nodruft, A. K. Martinolich, G. R. Robinson, F. L. Schmidt and Gerald Weisler.

Doctor W. A. Bradford comprises the Courtesy Staff. Assistant administrator is Mrs. Mona Santiago of Waveland.

The hospital's growth is also reflected in the increasing number of professional nurses, the on the staff.

Mrs. LuAnn Favre is director of nurses and her staff is composed of some 40 registered nurses, practical nurses and nurses aides.

Services include laboratory tests conducted at the hospital by trained lab technicians.

Samples of blood and body fluids as well as X-ray pictures help doctors determine accurately what treatments are needed.

Over the years there has been an up-grading in the hospital's maintenance forces with crews now working on the grounds to keep floors and walls cleaned, windows washed and trash disposed of.

The grounds are reasonably well tended and shrubs periodically clipped.

The American flag flies, weather permitting.

Gilmore said cars parked on the grounds by parents of North Bay are creating a hazard when the young students dart across Dunbar Avenue causing near accidents that could become tragedies.

The hospital is equipped with an emergency generator, vital in this storm and flood prone area.

In the event of an outside power failure, the generator requires only one to ten seconds to pick up the load and in the interim battery powered lights come on instantly.

Food service at Hancock General is under the supervision of Mrs. Jerri Hortath, registered dietitian, who plans the special diets and menus ordered for patients by their physicians.

Clean and cheerful rooms are equipped with telephones, television upon request, and an intercommunication system that gives patients immediate contact with the nursing stations.

Hancock General's 25,790 square feet of floor space includes offices for the administrative staff, composed of 12 employees.

There is an admitting office, visitor's lounge, comfort station, a gift shop, chapel, nursing stations, laboratories, a medical reference file room, emergency room, operating room, kitchen, maternity ward, radiology, pharmacy, an x-ray department, 11 private rooms with baths, 11 semi-private rooms, wards, a conference room, a computer, the upstate meeting of the hospital board, the hospital auxiliary meeting, medical staff, patients and visitors, continuing education programs for employees.

Activities at the hospital are controlled by the board of directors, on which Mrs. Gloria R. Johnson, president, with Harry R. Johnson, first vice president, George R. Johnson, second vice president, and J. D. Johnson, secretary, are members.

support this fund-raising endeavor. The gift shop hours are from 7 a.m. to 2:30 p.m., Monday through Friday and from 7 a.m. until Saturday and Sunday.

Volunteers from the Ladies Auxiliary provide important services including personal

services to patients, television rentals, directing guests, delivering mail and packages, and occasionally shopping.

The Auxiliary meets monthly on the first Thursday at 10 a.m.

Mrs. Maurice George is now completing her term as president. Incoming officers will

be elected next month. Hancock General Hospital has been surveyed by the Joint Commission on Accreditation of Hospitals and has met commission standards of providing acceptable levels of patient care and maintaining primary objectives of safety and welfare of the patients.

# Good books can guide one's destiny

**Pay For It and  
And Take It!**  
By S. G. THIGPEN  
When you go to the grocery store you select what you want, carry it to the cashier, pay for it and take it home. It's yours because you have paid for it.

It's the same with life. You select what you want to be or what you want to do in life, you pay the price for it, and it is yours.

While you do not pay in the same way that you pay for groceries, yet you just as definitely pay the price for what you get. There is a thing is worth, and you have to pay for it.

Say a young lady wants to become a nurse. The price is high - she goes into the hospital as a beginner and works for low wages, and while working she studies

subjects required for her to become a registered nurse.

After a few years she graduates, and then she works at good pay. She pays the price in hard work and study to get what she wants.

Say that a young man wants to be a doctor. The price is high for this, too. The young man pays this high price in years of hard work and long study, and at last becomes a doctor.

And so it is in the preparation for any trade or profession. Each has its price. You select what you want, then pay for it in the necessary work and study, and it is yours.

James Lane Allen wrote: "A man is, literally, what he thinks; his character being the complete sum of all his thoughts. A man's mind may be likened to a garden which may be intelligently

cultivated or left to grow wild. Just as a man may keep his mind from growing flowers and fruit, so he may allow it to become a garden of weeds and thorns. By pursuing the wrong, instead of the right, he discovers that he is a failure. Since a person is, literally, what he thinks, how important is the

By pursuing the wrong, instead of the right, he discovers that he is a failure. Since a person is, literally, what he thinks, how important is the

## Aluminum sculpture proposed for spoils island in Gulfport

Consolidated Aluminum Corporation together with a group of technical professionals and Gulfport artist, Joe Davis, are proposing an unprecedented public arts project for the Mississippi Gulf Coast.

Burk and Associates Consulting Engineers, Gulf Cities Laboratories, and Capitol Welding Corporation are also participating in the project to place a large contemporary sculpture in the Gulfport Harbor Area. The Davis Sculpture, "Triton," named for Poseidon's trumpeter, is a 70 foot, three-pronged spire of special alloy aluminum which will "trigger" lighting from a small, man-made island located just south and west of the State Port Facility at Gulfport.

The artist estimates his sculpture will be struck by lightning 100-150 times per year, based on reported average annual strikes at scientific lightning research towers in Lugano, Switzerland.

Each strike will last from 1-500 to 1-10 of a second, effecting momentary temperatures of approximately 30,000 degrees Kelvin, or about five times hotter than the surface of the sun.

Not satisfied to merely tamper with lightning, Davis proposes to change the traditional complexion of thunderstorms. Large brightly colored mirrors and a gas-doped "arc-sphere" at the heart of the sculpture will produce spectacular plasmas and exceptionally brilliant displays of light and color. Nothing that the luminosity of lightning far exceeds that of any artificial light source, it is anticipated that Triton's visual effects will be observable at considerable distance.

Capitol Welding Corporation, specialists in exotic welding and metals fabrication techniques, will supplement Consolidated Aluminum's Gulfport extension facility during the process of fabricating the actual sculpture.

Burk and Associates, Consulting Engineers, will provide scientific and design assistance necessary to insure that the sculpture does not present structural or environmental hazards and to facilitate compliance with standard restrictions which would be leveled on any harbor project by the U.S. Corps of Engineers. Gulf Cities Laboratories is providing soil analysis and connection analysis of the island sub-surface at the sculpture site.

All aluminum for "Triton" will be provided by Consolidated Aluminum Corporation, including three to five million pounds of special alloy aluminum.

The sculpture's construction is being financed by a bond issue authorized by the Gulfport City Council. The bond issue will allow the city to borrow money to pay for the sculpture. The city will then sell the sculpture to a private company, which will then sell it to a collector. The city will then receive the proceeds from the sale of the sculpture, which will be used to pay off the bond issue.

practical and least visible components. A triplet array of anodized aluminum wide-angle mirrors are mounted on spring-loaded booms which deploy from the base. The mirror booms are designed to "give" under high wind

Notwithstanding physical and meteorological application, Consolidated Aluminum is itself interested in the behavior of aluminum alloys while bearing huge current loads.

Likewise, materials used in high-voltage power lines; at their Ultra-High-Voltage Laboratory in Pittsfield, Mass. for similar testing purposes. "Triton" may also foster some technical benefit in other fields such as laser, and high energy plasma research.

Davis' previous works of art have been displayed at the New York Times Book Review, "The Snow Leopard" was a Literary Guild featured alternate, and was in "Book Digest."

## BOOK REVIEW

Peter Matthiessen's National Book Award-Winner, "THE SNOW LEOPARD" published in Bantam Paperback September 1

"In late September of 1979, I set out on a journey to the Crystal Mountain, two hundred and fifty miles or more to the Land of Dolpo on the Tibetan Plateau. Twelve years before I had seen those astonishing snow peaks to the north; to close that distance, to go step by step across the greatest range on earth to somewhere called the Crystal Mountain, was a true pilgrimage, a journey of the heart.

So begins The Snow Leopard, Peter Matthiessen's National Book Award-winning account of his journey through the Himalayas, published in Bantam paperback in September.

A hardcover bestseller in its Viking Press edition, "The Snow Leopard" was a Literary Guild featured alternate, and was in "Book Digest."

The New York Times Book Review, "The Snow Leopard" was a Literary Guild featured alternate, and was in "Book Digest."

The Washington Post Book World described "The Snow Leopard" as "a book fiercely felt and magnificently written," and Saturday Review called Matthiessen "one of the important wilderness writers of our times."

Naturalist and novelist

Matthiessen, in the wake of his wife's death, set out with field biologist George Schaller on an arduous 250-mile trek from Katmandu to the Tibetan plateau. Together they were investigating the mating patterns of the blue Himalayan sheep, and hoping for a glimpse of the fabled white snow leopard. But for Matthiessen, the adventure was also an inner testing of himself and his adopted Buddhist faith.

Passing over the high Himalayas, seeking the near mythical snow leopard, Matthiessen attained greater understanding of himself and his world, and finally arrived at the ancient holy place of Tibetan Buddhism, Crystal Mountains.

Peter Matthiessen is well known as both a naturalist and a novelist. He has previously travelled to remote regions of Africa, South America, New Guinea and the Arctic. He has written a dozen books of non-fiction, and five novels including "Far Toruq."

## Consumer agent advises cautious use of credit

**MONEY TALK?**  
If you're thinking about buying a new car, a new house, or a new boat, you're probably thinking about credit. But before you go out and get a credit card, you should first consider the risks involved. Credit can be a double-edged sword. It can give you the means to buy what you need, but it can also leave you in a financial bind if you're not careful. So, before you go out and get a credit card, you should first consider the risks involved. Credit can be a double-edged sword. ## 'Swinging bridges' added to historical register

Four swinging suspension bridges in Mississippi comprise a thematic group entry in the National Register of Historic Places, according to Elbert R. Hilliard, director of the Department of Archives and History, Jackson.

Hilliard was notified of the entry by the Heritage Conservation Service, Department of the Interior, Washington, D.C. The bridges, constructed early in the twentieth century, are located in Jefferson, Hinds, and Rankin counties: Byram Bridge, Byram; Old Hill Place Bridge, near Cannonburg; Coon Box Fork Bridge, Coon Box; and Youngblood Bridge, Union Church.

Meeting the transportation needs of farmer and occasional travelers in these counties, swinging suspension bridges were well suited for construction across the ravines and deep creek beds that separated rural settlement areas.

Known locally as "swinging bridges" because of the tenuous quality of the arched decks, the structures proved to be a remarkable vernacular adaptation of their larger predecessors, the Wheeling (1840) and Brooklyn (1883) bridges.

The design by Schuster and Jacob of Fayette for the cable anchoring system incorporated in the four bridges was improved by bridge builders W.H. Groome and Son, also of Fayette, with concrete used for the cableanchoring holes instead of wood.

While the three Jefferson County bridges have identical piers and all-wooden decks, the Byram Bridge utilizes more sophisticated structural features such as steel I-beams and steel subflooring.

These changes express the stylistic evolution as well as the improved stability of larger swinging suspension bridges constructed in central Mississippi after 1900.

The proliferation of these bridges in this area (only these four survive of over one hundred) was caused by their simplicity and utility of design for construction and maintenance. With the increase in vehicle transportation toward the middle of this century, and the growing concern for speed and continuous two-way traffic, swinging suspension bridges and numerous older connecting roads became disused, abandoned, or bypassed.

The placing of these structures on the National Register indicates their

significance in both engineering and cultural history and their worthiness of preservation.

The National Register of Historic Places, authorized by the Historic Preservation Act of 1966, identifies those properties worthy of preservation for their historic, architectural, or cultural significance and provides some measure of protection from alteration by federally supported projects. The National Register program is administered in Mississippi by the Department of Archives and History.

"BIRTH OF THE BLUES"—Paramount's 1941 release of "Birth of the Blues" stars, left to right, Mary Martin, Carolyn Lee and Bing Crosby and can be seen on Mississippi ETV's "Film Classics" at 8 p.m., Friday, September 14. The film contains 15 songs which were made hits by the movie's success. Set in New Orleans, the movie tells the story of a Dixieland jazz band with his mind and heart set on forming a band.

## Blue Mountain College named historic district

The Blue Mountain College Historic District has been entered on the National Register of Historic Places, according to Elbert R. Hilliard, director of the Mississippi Department of Archives and History, which administers the National Register Program in the state.

Hilliard was notified of the listing by the Heritage Conservation Service, Department of the Interior, Washington, D.C.

The Blue Mountain College Historic District comprises twenty-three buildings on the campus of the oldest college for women in the state, located on State Highway 15 in northeast Mississippi.

A variety of architectural styles are represented in the district, ranging from the eclecticism of the turn of the century to the popular Colonial Revival style, with some later buildings exhibiting the influence of Frank Lloyd Wright.

The buildings remain a cohesive group, however,

because of their grouping around the central administration building, their adaptive situation in the rising terrain, and the use of compatible materials and architectural details.

Curving pathways linking the buildings, 1930s street lamps, and brick enclosing gateways also contribute to the visual continuity of the district.

Blue Mountain College was founded in 1873 by Mark Perrin Lowrey, Baptist preacher and Civil War general, who, along with his two daughters, made up the faculty of what was then known as Blue Mountain Female Institute.

Leadership of the college remained in the Lowrey family until 1960, although ownership of the college was transferred to the Mississippi Baptist Convention in 1918.

Lowrey's oldest daughter, Modena Lowrey Berry, who served as principal of the college for over sixty years, was the second woman in state

history to be named to the Mississippi Hall of Fame.

The earliest buildings on campus represent the second period of building construction in the history of the college, since the earlier buildings, of frame construction, were destroyed by fire.

The Lowrey Memorial Baptist Church (1908), Heam Jennings Dormitory (1903, with 1923 addition), and Lowrey Hall (1900), all of fireproof brick construction, reflect the prosperity and status of Blue Mountain College at the turn of the century.

Other important buildings are the Lawrence T. Lowrey Administration Building (1928), a Colonial Revival building which stands in the center of the campus, and Whitfield Dining Hall (1928), which incorporated columns salvaged from the original administration building.

The National Register of Historic Places, authorized by the Historic Preservation Act of 1966, identifies those

properties worthy of preservation for their historic, architectural, or cultural significance and provides some measure of protection from alteration by federally supported projects.

### Brief

**LEPER PRIEST**  
"Damien," an award winning, one-character play about the famed "leper priest" of Molokai, will be rebroadcast at 8 p.m., Thursday, September 13, on the Mississippi ETV Network. First seen on public television last summer, the Hawaii Public Television production has won several awards, including the prestigious Peabody. Terence Knapp as Father Damien recounts the experiences and insights of Damien's life, which was devoted to serving the exiled lepers in the Hawaiian Islands. Much of this history is recalled in flashback as Damien, who died a leper in 1889, watches his own funeral procession, as a spirit.

"TELEVISION IS FOR LEARNING"—Mississippi ETV's instructional television series preview "Television Is for Learning," featuring samples of the 13 new instructional series scheduled for this season, will air at 7 p.m., Thursday, September 13, and repeats at 3 p.m., Sunday, September 16. This special also briefly explains how ETV evaluates schools' needs in order to know what should be broadcast, and informs viewers how ETV can be received in schools. Presenting Mississippi ETV's special preview, are, from left to right, Reta Richardson, director of education at Mississippi ETV, Chris Dong, Pam Tucker and George Harman, all of Jackson.

# OLA class rings go to 38 seniors

By MARY LOU KOCH  
OLA Publicist

September 7 was just another day for most people in Bay St. Louis, but not so for 38 excited seniors at Our Lady's Academy. Parents, friends, and fellow students watched enthusiastically as these upper classmen participated in a Mass and ceremony to

receive their long-awaited class rings at Our Lady of the Gulf Church.

Mary Beth Waits read the opening commentary, followed by the entrance procession of seniors and Father Louis Lohan, celebrant for the Mass.

Mini-Jarreau and Annette Bordeaux played guitars as the seniors sang "Beginning

Today." Other hymns chosen by the class for this celebration were "Just a Closer Walk with Thee," "Look Beyond the Bread You Eat," and "Hail Mary."

Special readings were presented by LeAnn Cain, Gwen Favre, and Laurie Gex.

Offertory gift bearers were Dorothy DesAngles, Kelly Poolson, Gigi Staehle, Monda Dickinson, and Whitney

Johnston. Wood, class president, addressed the audience on the meaning of the occasion, followed by the blessing of the rings. Mr. Michael J. Ryan, principal, and Ms. Pam Waller, senior sponsor, then presented the rings.

After the recessional hymn "Follow Me" the students received friendly

congratulations, then were taken to Homestead Restaurant for a luncheon celebration.

Seniors in the 1979-80 class include:

Ellie Madeline Battalora, Julie Anna Boudreaux, Le Ann Cain, Stacie Lynn Comeaux, Dorothy Louise DesAngles, Anna Amanda Dickinson, Gwendolyn Ann Favre and Leslie Hope Furman. Also,

Elizabeth Ann Garcia, Laurie Worthing Gex, Michel Andre Hoelle, Sally Anne James, Whitney Faith Johnston, Monica Louise Jordan and Delarie Agnes Lacher. And Michele Colleen Lagasse, Marguerite Ceola Therese Lizana, Nancy Ann Martinovich, Maury Pringle McCurdy, Carol Lynn Pauratore, Kelly Elizabeth Poolson, Cynthia Ann Regan and Theresa Maria Ryan. And Elizabeth Ann Santa Cruz, Suzanne Saussy, Donna Lynn Scafield, Ellen Marie Schmitt, Anna Marie Spotorno, and Leslie Ann Staehle. And Gretchen Margaret Steinriede, Shelly V. Stewart, Edith Elizabeth Thompson, Nancy Carol Toomey, Mary Elizabeth Waits, Elizabeth Ann Williamson and Lauri Ann Wood. Theresa Ann Garcia.

## Library fall shows include doll display

Fall activities planned at the branches of the Hancock County Library System during September include display of the doll collection of Patty Chevis, daughter of Dr. and Mrs. Sidney Chevis, at City-County Library.

In the Crawford Room these traveling exhibit of the Mississippi Art Colony featuring award-winning art work in many mediums.

In October, the works of Maggi, the much-celebrated contemporary artist from Louisiana will be on display in the Crawford Room.

Gil Fortier's woodcarvings and scrimshaw will also be featured in the Bay branch's display case.

The Jackson-Symphony Stringed Quartet will present a program of popular and classical music at the Bay Library at 8 p.m. Tuesday, November 20.

The Friends of the Library will hold a reception preceding the concert.

The November exhibit will be the works of Nina Burke, a new resident of Hancock County.

The November display will be the elephant collection of Mrs. Harrison Life of Waveland.

Throughout the fall, the Waveland Library will display the works of several artists including Maureen Kilmer of New Orleans; Sheld Doran of New York; Yvonne Hasney of Waveland and Wiley Churchill of Florida.

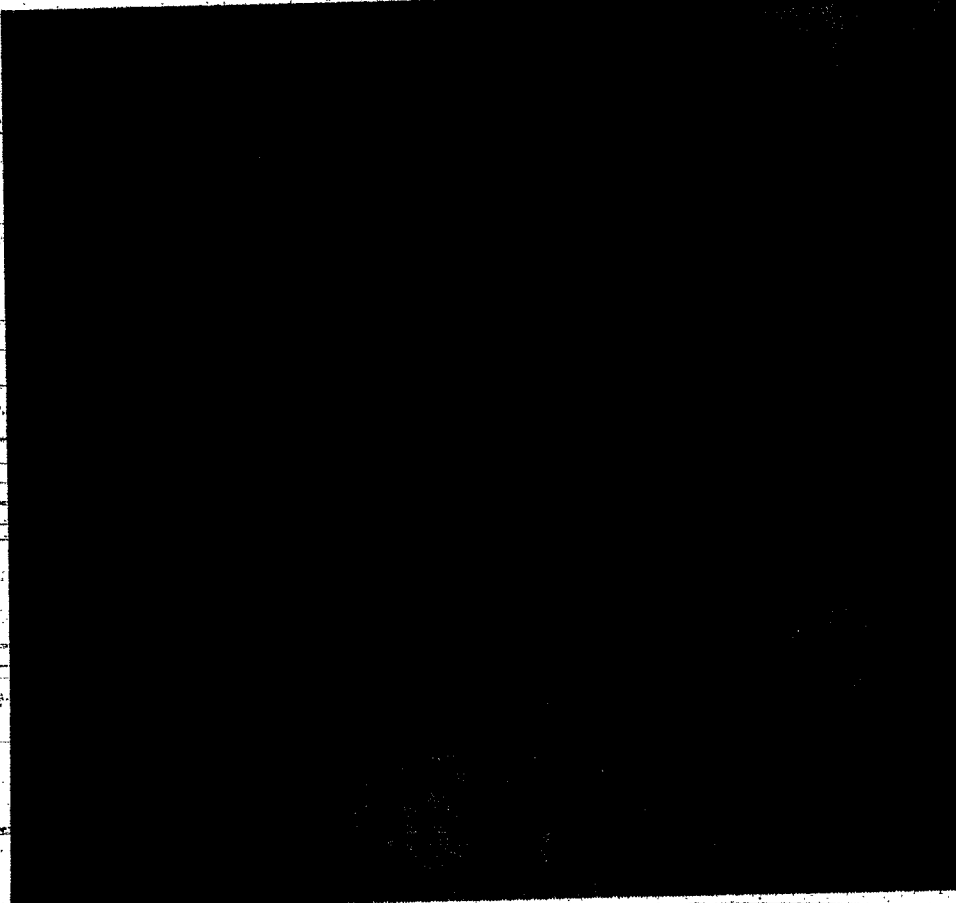

In addition, two educational programs will begin in the fall. One is called "How to Survive in High School Using Library Resources."

Library staff members will be taking this program to the schools throughout Hancock County.

The other program is for adults and is called "Sharing Literature with Children."

This program was developed to show parents and other adults who work with children the special and exciting ways of sharing literature with young people.

The informal workshops will be held at City-County Library and any other place (churches, day care centers, etc.) where adults want to learn the joy of bringing children and books together.

**DOLL EXHIBIT**—The Hancock County Library System's City-County Library in Bay St. Louis this month is featuring in its Meccanum lobby display case an exhibit of dolls from the collection of Patty Chevis, daughter of Dr. and Mrs. Sidney Chevis of Bay St. Louis. (Staff photo by Randy Ponder)

## City-County Library art display continues

A special traveling art exhibit of paintings by Mississippi Art Colony members is currently on display in the Crawford Room of the City-County Public Library on U.S. 90. The exhibit will be open to the public during the month of September during regular library hours.

The art tour, coordinated by the Mississippi Library Commission, will also visit four other public libraries in the state.

The Mississippi Art Colony is a group of practicing artists who meet biannually for painting workshops. Paintings included in the exhibit were selected during the workshop held April 25-29 at Camp Henry S. Jacobs in Utica.

Twenty-six paintings were chosen by workshop instructor Harvey Sherman Harris. Harris is a member of the art faculty at Louisiana State University.

Highlights of the exhibit include: "The Secret Place" by Lallah Perry of Cleveland, Mississippi, which received the "Best in Show" award. Lallah Perry is an art in-

structor at Delta State University. Her acrylic painting, "The Secret Place," demonstrates a new direction in her work. In it she explores textural interest combined with subtle color gradation.

The work which received second place is "Night Burst" by Irene Gantz of Belzoni. Ms. Gantz has studied almost exclusively with the Mississippi Art Colony. She is represented by her loosely handled and richly darkened

watercolors.

Other works included in the show are an embossed print, "Art 103," by Blanche Batson of Jackson; "Descent," a mixed media collage by Halcyone Barnes of Summit and "Fish from the Reservoir" by Elizabeth Waller of Jackson.

The exhibit of 26 works of art will be on exhibit in the Crawford Room of City-County Library during the month of September.

## no problem when Jim Walter builds!

Regardless of what you've heard or read in the news, if you own property, mortgage financing is no problem when Jim Walter builds for you. Jim Walter has PL ENTY of readily available dollars to build new homes for his customers. In addition, to help keep the cost of owning a new home as low as possible, Jim Walter does NOT add "points" or "closing costs" that others charge to further inflate the price you pay.

Jim Walter offers more than 20 LOW COST homes that can be built on your property to almost any stage of finish, from the shell home to one that is 90% complete. This means that you'll have an opportunity to cut an already low price—even more, simply by doing some of the inside finishing work yourself. Do the electrical work, install the plumbing, finish the wallboard. You tell us how much you would like to do. The more you do, the more money you'll save. And, with today's high-spiraling costs, everyone wants to save money.

## You can count on Jim Walter WE DO IT RIGHT

Get complete information and cost of building on your property. Get the facts about our INSTANT mortgage financing that takes only a day or two instead of the usual weeks or sometimes months for credit approval. Let us tell you about Jim Walter custom construction methods. We want you to see the homes we build and tell us about all of the money-saving options offered to you. We want you to know your cost, first hand and what your monthly mortgage payment would be to build any one of the more than 20 models on your property to the stage of completion you choose. We want you to have ALL the facts about building the Jim Walter way. Call, stop by or send the coupon to our nearest display park. WE DO IT RIGHT!
